QUESTION 1

Your customer is migrating CS1000 devices to Avaya Aura and is asking what role the Avaya Device Adapter plays.

Which two statements about an Avaya Device Adapter are true? (Choose two.)

A. It is a Breeze?Snap-in that provides CS1000 endpoint Call Park and Page functionality.

B. It is a Breeze?Snap-in that allows CS1000 endpoint registration with Communication Manager.

C. It is a Breeze?Snap-in that allows CS1000 endpoint feature support from Communication Manager.

D. It is a Breeze?Snap-in that allows CS1000 endpoint registration with Session Manager.

Correct Answer: AD

QUESTION 2

Your customer is asking about the Multiple Appearance Directory Number (MADN) feature that has been added in support of CS1000 migrations. It includes Single Call Appearance/Arrangement (SCA) which works like Communication Manager bridging, and multiple Call Appearance/Arrange (MCA) which works like bridging on the CS1000.

Which statement about MCA is true?

A. It is only available on Avaya Equinoxclients.

B. It is only available on Device Adapted sets.

C. It is tied to a particular call appearance on the primary endpoint.

D. It makes all calls private.

Correct Answer: D

QUESTION 3

You are planning a branch location that requires Tl/El Public Switched Telephone Network (PSTN) trunks. There will be a peak hour usage of 1 PSTN trunk for every 20 of the 500 users.

How many PSTN trunks and DSP resources will be needed to support calls between IP telephones and the PSTN in the branch?

A. 31 PSTN trunks and 32 DSP resources

B. 25 PSTN trunks and no DSP resources

C. 25 PSTN trunks and 25 DSP resources

D. 26 PSTN trunks and 27 DSP resources

Correct Answer: A

QUESTION 4

A design you are working on calls for several "G series" media gateways, and you have determined the number of Digital Signal Processor (DSP) resources that are needed.

In which two ways can you determine how many "G series" gateways are needed in a design? (Choose two.)

A. Divide the calculated number of DSPs by 320 to determine how many G450s are needed.

B. Divide the calculated number of DSPs by 120 to determine how many G430s are needed.

C. Divide the calculated number of DSPs by 340 to determine how many G450S are needed.

D. Divide the calculated number of DSPs by 128 to determine how many G430s are needed.

Correct Answer: B

QUESTION 5

You are interested in having multiple devices to register with the same extension number, but use only one user license.

Which three are required for the Multiple Device Access feature? (Choose three.)

A. Avaya Aura Communication Manager

B. Avaya one-X?Client Enablement Services

C. Avaya Aura Session Manager

D. Avaya Aura Application Enablement Services

E. Avaya Aura System Manager

Correct Answer: ADE
