QUESTION 1

Cloud architecture design is very flexible and does not require mastery of UML

A. Wrong

Correct Answer: A

QUESTION 2

Which of the following descriptions of the CSE functions of an enterprise microservice management platform is wrong?

A. Provide enterprises with full life-cycle management capabilities of Docker containers, such as rapid application packaging / deployment and automated operation and maintenance.

B. One-stop microservice management, including service registration, configuration, governance, monitoring dashboard, and transaction consistency management.

C. Provide multi-language sDK for new microservices, and provide low-cost retrofit access to existing applications.

D. A series of supporting microservice development tools, including code generation, contract editing, local and remote debugging.

Correct Answer: D

QUESTION 3

What benefits can the microservices architecture bring? ()

A. The boundaries of service modules are clearer: microservices emphasize modular structure (REST interface calls), which is very important for large teams.

B. Support independent deployment: Simple services are easier to deploy. Because services are autonomous, they do not cause system crashes if problems occur.

C. simple operation and maintenance: stateless, self-service operation and maintenance make the system without a mature operation and maintenance team (mechanism), which greatly saves costs.

D. Allow technology diversity: With microservices, you can mix and match multiple programming languages, development frameworks, and data storage technologies

Correct Answer: ABD

QUESTION 4

What does Huawei Cloud Ecology include? ()

A. partner

B. cloud community

C. cloud market

D. training and certification

Correct Answer: D

QUESTION 5

Container orchestration tools included? (Multiple choices)

A. Marathon

B. Kubernetes

C. Neutron

D. Horizon

Correct Answer: AB
