- **800,000+** Satisfied Customers

QUESTION 1

To support the "buy one get one free" functionality, when a consumer adds an item to the shopping cart, another applicable item should be added automatically. The customer has an external service that they intend to use to determine the applicable item.

How can this feature be implemented and made available via REST Service in IBM WebSphere Commerce V7 FEP 7, with minimum customization?

A. Extend OrderItemAddCmd/OrderCalculateCmd to call the external service. The extension will automatically be invoked when the CartHandler service is used.

B. "Buy one get one free" is a supported type of promotion, it can be created and managed using the Promotions tool in IBM Management Center for WebSphere Commerce. The feature is available in the out of the box CartHandler service.

C. Implement a ResourceHandler which invokes a custom entity bean. The custom entity bean calls external service and updates the PX_PROMOTION table. OrderItemAddCmd will automatically process the table and add the free item accordingly.

D. Extend the out of the box OrderHandler, which invokes processOrChangeOrder() in OrderHelper: update ChangeOrderSOIBODMapping.xml configuration with custom implementation of OrderItemAddCmd/OrderCalculateCmd to call external service and add the free item accordingly.

Correct Answer: C

QUESTION 2

In orderto unit test a new IBM WebSphere Commerce service module, a UnitTest project is created during code generation. Inside the UnitTest project, there are J Unit tests to create the multiple messages required to test the functionality. Which authentication mechanism can be used to most quickly create a user identity such that the service specified can be invoked using that identity?

A. Plain(cleartext)

B. LDAP

C. Callback Handler

D. Kerberos

Correct Answer: B

QUESTION 3

An application developer is working on IBM WebSphere Commerce V7 FEP 7. and uses CATENTRY.FIELD1 to store the loyalty points associated with the products. The developer needs to display the loyalty points associated with each product on the product display page in the storefront.

Which three of the following search components need to be modified to achieve this?

A. wc-data-config.xml

B. we-rest-resourceconfig.xml

C. schema.xml

D. wc-component.xml

E. element in wc-search.xml and add field1 index

F. element in wc-search.xml and add field1 index

Correct Answer: BDE

QUESTION 4

A developer is asked to remove the "No Inventory" option that appears in the Store Publish Wizard when publishing ExtendedSitesV2.sar. Which file should be modified in ExtendedSitesV2.sar before publishing?

A. ibm-wc-load.xml

B. Store-refs.xml

C. MemberRegistrationAttributes.xml

D. ForeignKeys.dtd

Correct Answer: D

QUESTION 5

A developer has created a new custom table that needs to be staged to production. Which of the following activities needs to be performed in order to achieve this goal?

A. Add the custom table entry to the STAGLOG table, and create database triggers to record the changes in the custom table to the STG tables (STGMERTAB, STGSITETAB or STGMRSTTAB)

B. Add the custom table entry to the STG tables (STGMERTAB, STGSITETAB or STGMRSTTAB) as needed, and create database triggers to record the changes in the custom table to the STAGLOG table

C. Modify stagingprop utility to add custom tables for stage propagation

D. Add the custom table entry to wc-stageprop.xml

Correct Answer: D
