**QUESTION 1**

An EMC NetWorker Administrator wants to start all of the EMC NetWorker processes on a Solaris server.

Which command would run?

A. /etc/init.d/networker start

B. /etc/rc2.d/gst start

C. /sbin/int.d/networker start

D. /sbin/init.d/gst start

Correct Answer: A

**QUESTION 2**

An EMC NetWorker Administrator needs to be able to back up and recover a high density active file system to the backup devices connected to local or remote storage nodes.

A. Add the SnapImage module

B. Add the NDMP module

C. Add the PowerSnap module

D. Add EMC NetWorker Module for Microsoft Applications

Correct Answer: A

**QUESTION 3**

What components are included with EMC NetWorker Module for Microsoft Applications?

A. PowerSnap and Replication Manager

B. PowerSnap and Microsoft VSS

C. Microsoft VSS and Replication Manager

D. PowerSnap and EMC Solutions Enabler

Correct Answer: A

**QUESTION 4**

Which process needs to be running on each NetWorker client?

A. nsrd

B. nsrexecd

C. nsrjobd

D. nsrmmd

Correct Answer: B

**QUESTION 5**

An EMC NetWorker administrator wants to set a full level backup for the first Friday of each month.

How can the scheduling be configured in NetWorker?

A. Disable "configuration => show schedule as a calendar" Enter "full first Friday every month" in the override

B. Select the month period in the default view Set level Full for the first Friday of the month

C. Select the month period in the default view Override level Full for the first Friday of the month

D. Select the week period in the default view Override level Full for the first Friday of the month

Correct Answer: A

**QUESTION 6**

An EMC NetWorker backup client contains 650 GB of data in 750,000 files and is presently being backed up by an EMC NetWorker server-to-storage node with six tape drives connected via Fibre Channel. Analysis has determined that the storage node and SAN connections to the tape drive are not impacting performance.

What is the recommended method for backing up this client?

A. Configure the client as a dedicated storage node and assign an appropriate number of tape drives.

B. Add another storage node to the EMC NetWorker environment distributing the load and bandwidth across the environment.

C. Add four additional tape drives to the library.

D. Increase the number of Fibre Channel ports into the SAN.

Correct Answer: A

**QUESTION 7**

What is a characteristic of EMC NetWorker virtual synthetic full backups?

A. All participating savesets must be on the same Data Domain system

B. Participating savesets must use a deduplication node for storage

C. Backup processing occurs on the storage node, bypassing the client

D. Deduplication processing occurs on the client, bypassing the storage node

Correct Answer: A

**QUESTION 8**

What is a core function of vStorage API support in EMC NetWorker?

A. Eliminates intermediate storage required by VCB to cache the snapshots

B. Supports ESX 3.5, 4.0 and 4.1

C. Change Block Backup and Recovery Support.

D. Utilizes intermediate copy step required by VCB.

Correct Answer: A

**QUESTION 9**

Which three components comprise EMC NetWorker\\'s three tier architecture?

A. Server, Storage Node and Client

B. Master Server, Media Server and Client

C. Server, Storage Agent and Client

D. Cell Manager, Devices and Client

Correct Answer: A

**QUESTION 10**

You have been asked to implement an EMC NetWorker backup solution with the following two requirements:

1.

Be able to back up Microsoft Exchange, SharePoint and Hyper-V servers.

2.

Be able to recover Microsoft application data from a persistent snapshot. What is a recommended EMC NetWorker add-on module?

A. EMC NetWorker Module for Microsoft Applications.

B. EMC NetWorker Module for Databases and Applications.

C. EMC NetWorker PowerSnap Module.

D. EMC NetWorker SnapImage Module.

Correct Answer: A

**QUESTION 11**

What EMC NetWorker software component controls the backup device in an EMC NetWorker Data Zone?

A. Storage Node

B. Client

C. Server

D. EMC NetWorker Management Console

Correct Answer: A

**QUESTION 12**

Which backup levels are supported for backup of DB2 databases in an EMC NetWorker environment?

A. Full, Incremental, and Incremental delta

B. Full, Incremental, and Levels 1-9

C. Synthetic full, Incremental, and Incremental delta

D. Synthetic full, Levels 1-9, and Incremental delta

Correct Answer: A

**QUESTION 13**

What is a requirement for performing Client Direct backups with the EMC NetWorker Module for SAP on Oracle?

A. Backup target must be an AFTD

B. Backup must always be a scheduled backup

C. RMAN must be used

D. Backup must be initiated from SAPDBA

Correct Answer: A

**QUESTION 14**

When the EMC NetWorker management console server and the EMC NetWorker server are installed on different hosts, what is required to administer EMC NetWorker server from the EMC NetWorker management console server?

A. Provide users on the EMC NetWorker management console server the administrative privileges

B. Provide users on the EMC NetWorker server the administrative privileges

C. Provide users on the EMC NetWorker management console server the console user privileges

D. Provide users on the EMC NetWorker server the console user privileges

Correct Answer: A

**QUESTION 15**

An EMC NetWorker environment, what is the minimum number of ports required per storage node in a non-AFTD device?

A. 2

B. 4

C. 6

D. 8

Correct Answer: A
