Correct Answer: AB

QUESTION 3

Who is a major competitor to HP Operations Orchestration, and what differentiates its capabilities for Process Orchestration from those of the competitor?

A. Microsoft: HP Operations Orchestration facilitates the hand-off between IT domains.

B. VMware: HP Operations Orchestration provides run book workflow automation.

C. Service Now: HP Operations Orchestration is optimized to manage all solutions in the HP stack,

D. BMC: HP Operations Orchestration ships with more out-of-the-box operations and third-party integrations.

Correct Answer: D

QUESTION 4

Which Task Automation IT process is supported by the HP Software Database and Middleware solution?

A. analysis of security vulnerabilities within application server code

B. database and middleware incident ticket management

C. securing of virtual farms hosting clustered database systems

D. automated distribution of application server code updates

Correct Answer: A

QUESTION 5

You are talking to a customer and the discussion centers around Transforming Service Delivery. The customer says that they are not yet ready to move to the cloud because they have security concerns, and they cannot risk their data becoming inaccessible.

What is the best way to respond to this objection?

A. I agree, most of our customers were cautious about the cloud, but their fears have proven to be unfounded.

B. With the HP private cloud solution, we can help you accelerate service delivery and ensure security and accessibility.

C. Inaccessibility was an issue in the past, but with network and bandwidth improvements, internet downtime is now a rarity.

D. We have monitoring solutions that can assess the availability and performance of an external public cloud provider.

Correct Answer: B
