QUESTION 1

Your customer has a RMS25CB080 RAID card. The Array is a RAID 6 with 6 Seagate Barracuda hard drives. During normal operation one drive failed and no action was taken. Alerts were generated but ignored. At a later date a second drive failed. Which of the following is the BEST advice you can give your customer? (Select ALL that apply).

A. Do nothing. The array is in degraded mode but still available.

B. Ensure a regular backup policy is implemented.

C. The customer needs to change the RAID card.

D. Customer should replace the drives and rebuild the array to restore redundancy.

E. All data is lost and nothing can be recovered.

Correct Answer: BD

QUESTION 2

A customer has an Intel® Server System R2308WTTYS based on two Intel® Xeon® E5-2630L v3 processors. The customer tries to power on a virtual machine in Microsoft Hyper-V Manager but gets an error: "The virtual machine could not be started because the hypervisor is not running. Verify that the processor of the physical computer has a supported version of hardware-assisted virtualisation". Which of the following statements explains this case?

A. The BIOS version of the system is less than R01.01.0008.

B. Intel® Virtualization Technology is disabled in the BIOS.

C. Hypervisor reinstallation is required.

D. Intel® Xeon® E5-2630L v3 processor does not support virtualization technology.

Correct Answer: B

QUESTION 3

Your customer is looking for new servers. Space is very limited; they have room for one new rack and want to add at least 30 servers. The servers need to be able to support E5-2600 v3 14 core processors, 768GB memory and 8 HDDs. Which of the following configurations would you recommend?

A. HNS2600TP and H2216XXKR2.

B. R2208WT2YS.

C. R1208WTXXX.

D. R1304WTXXX.

Correct Answer: C

QUESTION 4

Your customer has asked you to enable BMC management and remote access. They are now asking you to walk them through the different features which are available via the Embedded Web Server. They would like to see what the current power draw of the server is. Please choose all the correct answers from the list below:

A. Configuration Tab, Node Manager and Power Monitor

B. System Information Tab and power monitor

C. Server Health Tab and Power statistics

D. System Information Tab, FRU Information and Power Monitor

Correct Answer: C

QUESTION 5

Your customer is involved in planning a new compact data centre. Some of the critical features that need to be considered in such a data centre include heat and energy dissipation. This means they must know the power draw of the servers they plan to configure. What is the maximum number and speed of DIMMs that can be accommodated in the S1200V3RP in a 1U chassis? Please choose your correct answer from the list below:

A. 2DIMM slots at 1333 MT/s (ECC) RDIMMs

B. 4DIMM slots at 1333 MT/s (ECC) RDIMMs

C. 8DIMM slots at 1333 MT/s (ECC) RDIMMs

D. 2DIMM slots at 1600 MT/s (ECC) UDIMMs

E. 4DIMM slots at 1600 MT/s (ECC) UDIMMs

Correct Answer: E
