D. foo_entity

Correct Answer: B

QUESTION 11

Assume that:

$product is a loaded instance of Mage_Catalog_Model_Product/. Catalog Price Scope is set to global, and

$customerGroupid contains a valid customer group ID.

Which one of the following statements will correctly set new group prices?

A.
```
$product->addGroupPrice($price, $customerGroupId, 0)->save();
```

B.
```
$product->setGroupPrice(array(
        array(
            'website_id' => 0,
            'cust_group' => $customerGroupId,
            'price' => 724.99
        )
    ))->getResource()->getAttribute('group_price')
        ->getBackend()->afterSave($product);
```

C.
```
$product->addAttributeUpdate('group_price', array(
        'website_id' => 0,
        'cust_group' => $customerGroupId,
        'price' => 724.99
        ), 0);
```

D.
```
$product->getGroupPriceInstance()->addPriceRow(array(
            'website_id' => 0,
            'cust_group' => $customerGroupId,
            'price' => 724.99
    ));
```

A. B. C. D.

Correct Answer: B
