QUESTION 1

After installing an LPAR via NIM and rebooting, the LPAR cannot be reached from the network. Which of the following is the most likely cause?

- A. The NIM master left the client active as a NIM client
- B. The nim -o reset -aforce=yes command was issued on the server
- C. The nim -o network_config command was not issued on the client
- D. The gateway parameter was left blank in the network setup parameters

Correct Answer: D

QUESTION 2

Which of the following installation methods can be used to install an operating system in an LPAR?

- A. CD-ROM, NIM, NFS, Sysback, TFTP
- B. CD-ROM, NIM, mkysyb, Sysback, TFTP
- C. CD-ROM, mkysyb, NFS, Alt-Disk Install
- D. CD-ROM, NIM, mkysyb, Sysback, Alt-Disk Install

Correct Answer: D

QUESTION 3

A customer has a p690 system running AIX 5.1 configured in LPAR mode. The disk vendor sent a new firmware CD-ROM that needs to be applied immediately. The disk vendor is planning to send their service representative to accomplish this task. What does the system administrator need to do to prepare for the service representative without affecting other LPARs?

- A. Reassign the media bay from an LPAR
- B. Hot swap the internal CD-ROM device between LPARs
- C. Attach an external CD-ROM device via hot swap SCSI controller to an LPAR
- D. Dynamically reassign the internal CD-ROM to this LPAR

Correct Answer: C

**QUESTION 4**

What is required for Dynamic LPAR on a POWER4 system?

- A. AIX 5L Version 5.2, Hardware Management Console, An Ethernet connection between the HMC and the primary partition on the pSeries server
- B. AIX 5L Version 5.1, Hardware Management Console, An Ethernet connection between the HMC and each active partition on the pSeries server
- C. AIX 5L Version 5.2, Hardware Management Console, A serial connection to the HMC, An Ethernet connection between the HMC and each active partition on the pSeries server
- D. AIX 5L Version 5.1, Hardware Management Console, A serial connection to the HMC, An Ethernet connection between the HMC and each active partition on the pSeries server

Correct Answer: C

QUESTION 5

When planning for LPAR installation from CD-ROM, which of the following options must be considered?

- A. Only external CD-ROMs may be used for partition installation. Assign an additional SCSI card into an empty PCI slot in each LPAR.
- B. Use the media drawer CD-ROM for installing two partitions requires dynamically reassigning devices between partitions or bringing the partitions down.
- C. Use the dual port SCSI card for installing two partitions. Attach one port to the front of the drawer and one port to the back of the drawer.
- D. Up to four CD-ROMs can be installed in the media drawer. Each can be assigned to a separate active partition by dynamically reassigning devices between partitions or bringing the partitions down.

Correct Answer: B
