**QUESTION 1**

A developer has been tasked to create a method to push a record from the null state to the triActive state without having the action available on a form. What should be done to implement this design?

- A. Create a state transition from null to triActive in Form Builder and keep Visible unchecked in the state transition properties.
- B. Create a state transition from null to triActive in Data Modeler and keep Default Display unchecked in the state transition properties.
- C. Create a state transition from null to tri Draft, another from tri Draft to triActive in Form Builder, and keep Secondary Action checked in the state transition properties.
- D. Create a state transition from null to tri Draft, another from tri Draft to triActive in Data Modeler, and keep Secondary Action checked in the state transition properties.

Correct Answer: B

QUESTION 2

A workflow needs to perform a sequence of tasks many times for a finite set of records. Which workflow task should be used?

- A. Iter task
- B. Modify Records task
- C. Retrieve Records task
- D. Get Temp Record task

Correct Answer: A

QUESTION 3

Where is it possible to set field values for a state transition?

- A. In the state properties in the Data Modeler
- B. In the sub action properties in the Data Modeler
- C. In the state transition properties in the Form Builder
- D. In the state transition properties in the State Family Manager

Correct Answer: B

QUESTION 4

If a field is set to Read Only in a business object (BO), how does it affect a form based on that BO?

- A. The field will not be allowed to be used in the form.
- B. The field will have the Read Only box checked by default in the form, but it can be changed.
- C. The field will have the Read Only box checked by default in the form, but it cannot be changed.
- D. The field will not be set to Read Only in the form, and the field will have to be set to Read Only.

Correct Answer: C

QUESTION 5

How can a list be sorted to display more frequent values first?

- A. In the Data Modeler, set the sequence order in the properties of the List field.
- B. Values can only be sorted in ascending and descending order and cannot be ordered individually.
- C. In the Form layout, use the Manual Sort option to arrange the entries in the desired order sequence.
- D. In the List Manager, use arrows from the Order column to move entries to the desired order sequence.

Correct Answer: D
