QUESTION 1

Which two statements about security considerations in an SOA environment are true?

- A. Firewalls or routers are the mechanisms for securing an SOA business environment.
- B. Security policy decisions are made and carried out within an Enterprise Service Bus (ESB).
- C. Identities exist for both users and services, and both must be subject to the same controls.
- D. The creation of roles for business process task lists are used to prevent business partner access to protected assets.
- E. There is a need to manage identity and security across a range of systems and services that are implemented in a diverse mix of new and old technologies.

Correct Answer: CE

QUESTION 2

When starting to adopt SOA, which action should be taken early to help drive acceptance and success?

- A. Establish the SOA strategy and project roadmap.
- B. Identify the first services required and ensure they are designed well, considering security and scalability.
- C. Roll the SOA project in as the next phase of a project under development to prove the value to the business.
- D. Prepare the infrastructure for SOA by establishing a development environment, testing environment and the control process to promote services.

Correct Answer: A

QUESTION 3

Why is business and IT alignment so important to SOA?

- A. Applications can be rewritten to suit the needs of the business.
- B. It allows for a significant investment in technology and hardware.
- C. Business and IT can collectively fulfill the business needs and goals.
- D. Business and IT can decide which vendors to use and which business functions to outsource.

Correct Answer: C

QUESTION 4

Which is a role of an SOA governance body?

- A. Evaluating performance, availability and scalability of services
- B. Defining the processes, procedures, mechanisms and organizations that guide the implementation of services
- C. Performing critical evaluation and selection of the packages, software and hardware components of the architecture
- D. Identifying services from a decomposition of business processes and ensuring that these services enable realization of the business goals and drivers

Correct Answer: B

QUESTION 5

In the IBM SOA Reference Architecture, the service registry should be logically located with which other component?

- A. Access Services
- B. Process Services
- C. Infrastructure Services
- D. Enterprise Service Bus (ESB)

Correct Answer: D
