-  **800,000+** Satisfied Customers

**QUESTION 1**

Why is the root file system mounted read-only during boot and remounted with write permission later on?

- A. Because if problems with the root file system are detected during the boot, fsck can be run, without risk of damage.
- B. Because this way crackers cannot collect information about root with boot sniffers
- C. To avoid writing to the disk, unless the root password is known.
- D. To avoid other operating systems overwriting the Linux root partition
- E. Because the disk has its own write protection that cannot change by the operating system.

Correct Answer: A

QUESTION 2

What is the purpose of a PTR record?

- A. To provide name to IP resolution.
- B. To provide IP to name resolution.
- C. To direct email to a specific host.
- D. To provide additional host information.
- E. To direct clients to another nameserver.

Correct Answer: B

QUESTION 3

An SSH port-forwarded connection to the web server `www.example.com` was invoked using the command `ssh -TL 80 :www.example.com:80 user@www.example.com`. Which TWO of the following are correct?

- A. The client can connect to the web server by typing `http://www.example.com/` into the browser's address bar and the connection will be encrypted
- B. The client can connect to `www.example.com` by typing `http://localhost/` into the browser's address bar and the connection will be encrypted
- C. The client can't connect to the web server by typing `http://www.example.com/` into the browser's address bar. This is only possible using `http://localhost/`
- D. It is only possible to port-forward connections to insecure services that provide an interactive shell (like telnet)
- E. The client can connect to the web server by typing `http://www.example.com/` into the browser's address bar and the

connection will not be encrypted

Correct Answer: BE

QUESTION 4

Instead of running the command `echo 1 >/proc/sys/net/ipv4/ip_forward`, the configuration setting is going to be added to `/etc/sysctl.conf`. What is the missing value in the configuration line below? (Please specify only the missing value)

Correct Answer: `net.ipv4.ip_forward`

QUESTION 5

What command must be used to create an SSH key-pair? Please enter the command without the path or any options or parameters.

Correct Answer: `ssh-keygen`
