**QUESTION 1**

Which parameter must be set in the [global] section of smb.conf in order to make Samba use printers managed by CUPS?

- A. printing = cups
- B. printcap = cups
- C. printcap = /etc/cups/printers.conf
- D. print spooler = cups

Correct Answer: B

---

**QUESTION 2**

The [homes] section of smb.conf contains the parameter browseable = no. What are the resulting consequences? (Select TWO correct answers)

- A. When browsing the Samba server, there is no visible share called homes.
- B. The homes share can be directly accessed by specifically opening this share by its UNC path.
- C. When browsing the Samba server, users can open the homes share but they cannot see the content of their home directories.
- D. If the Samba server is part of an Active Directory Domain, only users in the group SeBrowsingUsers can browse the homes share.
- E. When browsing the Samba server, there is no visible share named after the current user.

Correct Answer: AB

---

**QUESTION 3**

Which of the following statements is true about DNS in an Active Directory Domain?

- A. When resolving DNS names all domain members must query the domain controllers or a server that serves the exact same zone content.
- B. It is not possible to use secondary DNS servers in conjunction with an Active Directory domain.
- C. DNS name resolution is not mandatory as long as a WINS server can be reached.
- D. Only A and AAAA records contain important information regarding an Active Directory domain, no other record types are used.

Correct Answer: A

---

#### QUESTION 4

The net \_\_\_\_\_ command is used to manage group mapping. (Specify only the sub command.)

Correct Answer: groupmap

---

#### QUESTION 5

What is true regarding the users listed in the option write list in a share declaration?

- A. All users listed in write list can write to the share no matter of the Linux file systems permissions of the share.
- B. Given sufficient Linux file system permissions, all users listed in the write list are allowed to write to the share.
- C. In case read only = yes is set for the share, even the users in write list are denied write access to the share.
- D. Given sufficient Linux file systems permissions, only those users listed in write list can write to the share that are listed in read list too.

Correct Answer: B
