**QUESTION 1**

A customer has a Communication Manager system with centralized call processing (S8730 with G650's at the main site). At each of the remote sites, connected via an MPLS network, they have G450's with S8300 LSP. Which feature would they need to implement in order to have four digit dialing between sites, through the SPTN, in case of a WAN failure?

- A. IGAR
- B. DCAC
- C. DPT
- D. SBS

Correct Answer: C

---

**QUESTION 2**

What is the preferred method for downloading firmware files to IP phones?

- A. TFTP is the preferred method, because it is better suited for large IP telephone deployments.
- B. HTTPS is the preferred method because firmware file downloads are encrypted using Transport Layer Security (TLS).
- C. TFTP is the preferred method because firmware file downloads can be encrypted using Transport Layer Security (TLS).
- D. There is no preferred method. Any of these addresses can be included in Option 176 within the DHCP scope.

Correct Answer: B

---

**QUESTION 3**

Which is NOT a service performed by the SIP Enablement Services (SES) Server?

- A. Proxy Server
- B. Location Server
- C. Session Boarder Controller
- D. Registrar

Correct Answer: C

---

**QUESTION 4**

What are two reasons for choosing 802.11a hardware for WLAN installs, instead of 802.11b/g? (Choose two.)

- A. 802.11a hardware operates at 2.4GHz.
- B. 802.11a hardware has greater range than 802.11b/g.
- C. 802.11a has a greater number of non-overlapping channels.
- D. 802.11a hardware is not disrupted by RF interference from microwave ovens.

Correct Answer: CD

---

#### QUESTION 5

Which three site survey factors should be used to measure the contours of Radio Frequency (RF) coverage? (Choose three.)

- A. link speed
- B. signal strength
- C. signal-to-noise ratio
- D. obstructions in the Fresnel Zone
- E. horizontal and vertical polarization

Correct Answer: ABC
