-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

How does the button Get Address, found on the Host Node Object > General Properties page retrieve the address?

- A. Route Table
- B. Address resolution (ARP, RARP)
- C. Name resolution (hosts file, DNS, cache)
- D. SNMP Get

Correct Answer: C

**QUESTION 2**

Source:	Any
Destination:	<u>web_public IP</u>
Service:	Any
Translated Source:	original
Translated Destination:	<u>web_private IP</u>
Service:	original

You just installed a

new Web server in the DMZ that must be reachable from the Internet. You create a manual Static NAT rule as follows:

"web\_public\_IP" is the node object that represents the new Web server's public IP address. "web\_private\_IP" is the node object that represents the new Web site's private IP address. You enable all settings from Global Properties > NAT.

When you try to browse the Web server from the Internet you see the error "page cannot be displayed". Which of the following is NOT a possible reason?

- A. There is no route defined on the Security Gateway for the public IP address to the Web server's private IP address.
- B. There is no ARP table entry for the protected Web server's public IP address.
- C. There is no Security Policy defined that allows HTTP traffic to the protected Web server.
- D. There is no NAT rule translating the source IP address of packets coming from the protected Web server.

Correct Answer: D

**QUESTION 3**

A Cleanup rule:

- A. drops packets without logging connections that would otherwise be dropped and logged by default.
- B. logs connections that would otherwise be accepted without logging by default.
- C. drops packets without logging connections that would otherwise be accepted and logged by default.
- D. logs connections that would otherwise be dropped without logging by default.

Correct Answer: D

---

**QUESTION 4**

Your company is still using traditional mode VPN configuration on all Gateways and policies. Your manager now requires you to migrate to a simplified VPN policy to benefit from the new features. This needs to be done with no downtime due to critical applications which must run constantly. How would you start such a migration?

- A. This can not be done as it requires a SIC- reset on the Gateways first forcing an outage.
- B. This cannot be done without downtime as a VPN between a traditional mode Gateway and a simplified mode Gateway does not work.
- C. Convert the required Gateway policies using the simplified VPN wizard, check their logic and then migrate Gateway per Gateway.
- D. You first need to completely rewrite all policies in simplified mode and then push this new policy to all Gateways at the same time.

Correct Answer: C

---

**QUESTION 5**

What must a Security Administrator do to comply with a management requirement to log all traffic accepted through the perimeter Security Gateway?

- A. Install the View Implicit Rules package using SmartUpdate.
- B. Define two log servers on the R76 Gateway object. Enable Log Implied Rules on the first log server. Enable Log Rule Base on the second log server. Use SmartReporter to merge the two log server records into the same database for HIPPA log audits.
- C. In Global Properties > Reporting Tools check the box Enable tracking all rules (including rules marked as None in the Track column). Send these logs to a secondary log server for a complete logging history. Use your normal log server for standard logging for troubleshooting.

D. Check the Log Implied Rules Globally box on the R76 Gateway object.

Correct Answer: C
