**QUESTION 1**

Which of the following is used to initially create trust between a Gateway and Security Management Server?

- A. Internal Certificate Authority
- B. Token
- C. One-time Password
- D. Certificate

Correct Answer: C

To establish the initial trust, a gateway and a Security Management Server use a one-time password. After the initial trust is established, further communication is based on security certificates.

QUESTION 4

Your boss wants you to closely monitor an employee suspected of transferring company secrets to the competition. The IT department discovered the suspect installed a WinSCP client in order to use encrypted communication. Which of the following methods is BEST to accomplish this task?

A. Use SmartView Tracker to follow his actions by filtering log entries that feature the WinSCP destination port. Then, export the corresponding entries to a separate log file for documentation.

B. Use SmartDashboard to add a rule in the firewall Rule Base that matches his IP address, and those of potential targets and suspicious protocols. Apply the alert action or customized messaging.

C. Watch his IP in SmartView Monitor by setting an alert action to any packet that matches your Rule Base and his IP address for inbound and outbound traffic.

D. Send the suspect an email with a keylogging Trojan attached, to get direct information about his wrongdoings.

Correct Answer: A

QUESTION 5

Which feature in R77 permits blocking specific IP addresses for a specified time period?

A. Suspicious Activity Monitoring

B. HTTP Methods

C. Local Interface Spoofing

D. Block Port Overflow

Correct Answer: A
