QUESTION 1

Match the Best Management High Availability synchronization.status descriptions for your SmartCenter Server (SCS)

- A. A3.B 1.C2.D4
- B. A4.B3.C 1.D2
- C. A3.B2.C 1.D4
- D. A3.B 1.C4.D2

Correct Answer: A

QUESTION 2

Which of the following statements about the Port Scanning feature of SmartDefense is TRUE?

- A. When a port scan is detected, only a log is issued ?never an alert.
- B. The Port Scanning feature actively blocks the scanning, and sends an alert to SmartView Monitor.
- C. A typical scan detection is when more than 500 open inactive ports are open for a period of 120 seconds.
- D. Port Scanning does not block scanning, it detects port scans with one of three levels of detection sensitivity

Correct Answer: D

QUESTION 3

In SmartDashboard, you configure 45 MB as the required free hard-disk space to accommodate logs. What can you do to keep old log files, when free space falls below 45 MB?

- A. Do nothing. Old logs are deleted, until free space is restored.
- B. Do nothing. The SmartCenter Server automatically copies old logs to a backup server before purging.
- C. Use the fwm logexport command to export the old log files to other location.
- D. Configure a script to run fw logswitch and SCP the output file to a separate file server.

Correct Answer: D

QUESTION 4

When configuring VPN High Availability (HA) with MEP, which of the following is correct?

- A. The decision on which MEP Security Gateway to use is made on the remote gateway\'\'s side (non-MEP side).

- B. MEP Gateways must be managed by the same SmartCenter Server.
- C. MEP VPN Gateways cannot be geographically separated machines.
- D. If one Gateway fails, the synchronized connection fails over to another Gateway and the connection continues

Correct Answer: A

QUESTION 5

When synchronizing clusters, which of the following statements is NOT true?

- A. User Authentication connections will be lost by the cluster.
- B. Only cluster members running on the same OS platform can be synchronized.
- C. In the case of a failover, accounting information on the failed member may be lost despite a properly working synchronization
- D. An SMTP resource connection using CVP will be maintained by the cluster.

Correct Answer: D
