QUESTION 1

What is the first step in optimizing an SMTPS session?

A. An unencrypted SMTP connection is intercepted and optimized, before a START-TLS is issued.

B. START-TLS is issued immediately by the client and intercepted by the client side SteelHead.

C. SteelHeads do not currently support optimizing SMTPS sessions.

D. An SSL client HELLO is sent by the client and intercepted by the client side SteelHead.

Correct Answer: A

QUESTION 2

The SteelCentral Controller for SteelHead Mobile is rebooted or becomes unreachable from the end user mobile client. What happens to their network connections?

A. The end user\\'s existing and new connections continue to be optimized as per policy.

B. SSL trusts will fail and SSL will be passed through, all other traffic is unaffected.

C. The end user\\'s optimized connections continue but new connections are passed through.

D. The end user\\'s network connections terminate and they must wait for the controller to come back online.

E. The end user\\'s optimized connections are reset and restart in pass-through mode.

Correct Answer: A

QUESTION 3

Regarding the registering of Steelhead appliances,

A. Local appliances (on the same IP subnet) are automatically registered every time because their 10byte probe is intercepted by the CMC appliance

B. Remote appliances are registered when a fixed-target rule is applied to the appliance directing it to the CMC appliance

C. Remote appliances are registered by proxy via the server-side Steelhead appliance

D. Remote appliances are registered manually when they have not auto-registered with the CMC appliance

E. Local appliances can only be registered manually, since fixed-target rules may only be applied to remote Steelhead appliances

Correct Answer: D

QUESTION 4

Select the command needed to add support for virtual in-path to your Steelhead appliance so that you can use WCCP or PBR with a Steelhead appliance.

A. in-path inpath0_0 enable

B. in-path oop enable

C. ip virtual enable

D. in-path virtual enable

E. in-path wccp_pbr enable

Correct Answer: B

QUESTION 5
