**QUESTION 1**

The exhibit shows a data center side serial clustering deployment. In this organization, not every remote site has a Steelhead appliance deployed, and all remote locations will be connecting to the data center.

For connections initiated from the data center, there is a possibility that the Steelhead appliances shown in the exhibit will end up peering with each other, rather than the intended remote Steelhead appliances.

Where are peering rules needed to prevent this problem?

- A. A only
- B. B only
- C. B and C
- D. A and B

Correct Answer: D

QUESTION 2

When upgrading a Steelhead appliance from the CMC appliance what methodologies can be used? (Select 2)

- A. Upgrade from uploaded image
- B. Upgrade from the CMC appliance flash
- C. Automatic download from support.riverbed.com
- D. Upgrade from URL

E. Upgrade from TFTP server

Correct Answer: AD

QUESTION 3

You are using Steelhead appliances in an Oracle Forms environment and are not seeing adequate acceleration. What could be the cause of this?

- A. You need to install a separate Oracle Forms license
- B. Oracle Forms optimization is enabled by default. However, you must set an in-path rule to enable this feature.
- C. Oracle Forms optimization can only be configured from the command line (CLI)
- D. Oracle Forms optimization only works with Oracle Applications 9i
- E. Oracle Forms optimization only works with Oracle Applications 8i

Correct Answer: B

QUESTION 4

When would Simplified Routing Destination Only be used? (Select 2)

- A. HSRP (Hot Standby Routing Protocol)
- B. VLAN bridging
- C. Multiple firewalls
- D. Bridged network
- E. There is no setting for Destination Only

Correct Answer: AD

QUESTION 5

You are troubleshooting a new Steelhead Mobile installation where none of the VPN users with Steelhead Mobile client installed are being optimized. You determine that the Steelhead appliance in the data center is not in-path for VPN users.

What are your options to fix this? (Select 2)

- A. Use the Steelhead in an out-of-path deployment using fixed-target rules in the Steelhead appliance
- B. Use the Steelhead in a hybrid in-path/out-of-path deployment using fixed-target rules in the Steelhead Mobile client

C. Put the Steelhead appliance in-path on the VPN concentrator segment using a multi-port NIC

D. Install the Steelhead Mobile Controller on the VPN segment

Correct Answer: BC
