**QUESTION 1**

John is the network administrator for a small company. The company's network equipment has become outdated, and John has been asked to recommend a plan to update the company's infrastructure. John has read extensively about the many advantages of using cloud-based services. Which of the following is an advantage of cloud-based services that John could cite to support his recommendation?

- A. Unlimited service options and choices
- B. Higher security in a cloud-based environment
- C. Elimination of need for high-speed Internet connection
- D. Elimination of equipment purchase and maintenance

Correct Answer: D

QUESTION 2

Disaster recovery planning is considered a best practice for all organizations. It is even more important when cloud-computing services are used. Which of the following should be included as part of a disaster recovery plan for companies that use cloud-based services?

- A. Company organizational chart
- B. Malware and anti-virus software updates
- C. Service-level agreement with a cloud-provider
- D. Inventory of services not dependent on the cloud provider

Correct Answer: C

QUESTION 3

Server-based networks typically contain centralized network resources, which are usually not available on peer-to-peer (P2P) networks. Which of the following examples describes a server based network?

- A. Three network clients connecting to a file server
- B. Downloading a file by using BitTorrent technology
- C. Sharing one or more files to another computer via the Internet
- D. A client connecting to another computer over the Internet to share music

Correct Answer: A

QUESTION 4

What is the biggest security concern with wireless networks?

- A. Firewall software is not available for access points.
- B. Wireless encryption algorithms must be implemented.
- C. Wireless networks do not support intrusion detection.
- D. Wireless networks do not support encryption via an access point.

Correct Answer: B

QUESTION 5

Which of the following is a security threat commonly associated with cloud-based services?

- A. Malware
- B. Phishing
- C. Hypervisor vulnerabilities
- D. Operating system vulnerabilities

Correct Answer: C
