**QUESTION 1**

You have built a website that incorporates responsive web design. However, Google has notified you that your site is not mobile-friendly. They report that several links are too close together.

Which of the following practices will resolve this issue?

- A. Optimize for touchscreen gestures
- B. Modify all links to text
- C. Modify all links to graphics
- D. Arrange the links to different areas of the page

Correct Answer: A

QUESTION 2

Which of the following is a recommended method in the W3C standards in the operability category to improve accessibility of a web site on a tablet computer?

- A. Provide a virtual magnifying glass that enlarges portions of a website.
- B. Placing critical information at the top of the page.
- C. Provide adequate contrast to make onscreen content visible in bright environments.
- D. Provide workarounds for actions triggered by physically moving the tablet.

Correct Answer: B

QUESTION 3

User-Centered Web Design focuses on understanding what users want, and regular testing to make sure users are getting what they want.

What are the primary benefits of this practice?

- A. Increased ecommerce revenue and lower labor costs
- B. Reduced development time and increased user satisfaction
- C. Reduced marketing expenses and improved user retention
- D. Improved product development and fewer web site errors (bugs)

Correct Answer: C

QUESTION 4

While updating a customer's web site, you want to optimize the look and feel for the site so it is appealing and functional. Which strategy would help with the optimization plan?

- A. Use UI design patterns from online libraries.
- B. Create a new custom UI for each web page.
- C. Copy the look and feel from computers sites.
- D. Copy and paste visual layout from online layouts.

Correct Answer: A

QUESTION 5

You are building an educational games website for children. You have determined that your users respond best to large, colorful, easy-to-read buttons to navigate through the site. You've created a prototype of the navigation element, and want to make sure it meets your user's needs. What kind of testing should be performed at this stage?

- A. Positional testing
- B. Responsiveness testing
- C. Usability testing
- D. Functional testing

Correct Answer: D
