QUESTION 1

Which statement best describes a Software-Defined Enterprise?

- A. An architecture framework designed to fully automate all IT services in all data centers removing the need for human interaction.
- B. An enterprise response to mainstream disorganization of resources in the data center that delivers on the promise of interconnected infrastructure and software- as a-service.
- C. An architecture that uses intelligence automation and common management to provide transparent governance of infrastructure and software-as a-service.
- D. An architecture that uses virtualization to replace all physical components in the data center while using localized management and compliance to deliver infrastructure and software-as-a-service.

Correct Answer: C

QUESTION 2

As part of setting up a company's disaster recovery plan a project manager has identified the need to synchronize storage used by the virtual machines to a remote disaster recovery site. Which product or component can be used to perform this task?

- A. vRealize Automation
- B. vCloud Connector
- C. Datastore Clusters
- D. vSphere Replication

Correct Answer: C

QUESTION 3

An administrator manages a multi-tier application that is comprised of web database and application servers. Which product would allow the administrator to move the web server to a public cloud while maintaining the same network settings and connectivity with the other two services?

- A. vRealize Operations
- B. vCloud Connector
- C. vFabric Suite
- D. vCenter Server

Correct Answer: B

**QUESTION 4**

A company needs a solution that allows moving some of the datacenter's workload to a public cloud during peak hours. The company does not want to pay for unused capacity during non-peak hours. Which VMware product will fulfill this task?

- A. vRealize APIs
- B. vCloud Connector
- C. vRealize Automation
- D. VMware NSX

Correct Answer: C

QUESTION 5

An administrator has installed and configured site RecoveryManager (SRM) to protect a private cloud infrastructure, but wants assurance that the plan put in place will actually work. How can the administrator properly test the site recovery manager setup?

- A. Tell SRM to simulate moving your workloads using vcloud connector.
- B. Tell SRM to initiate an HA failover test.
- C. Tell SRM to execute a non-disruptive recovery test.
- D. Tell SRM to vMotion protected VMs to the recovery site.

Correct Answer: C
