QUESTION 1

A colleague has been trying to configure NIC teaming on an ESXi host and has been unable to locate the vSphere NIC teaming drivers from the NIC vendor. Which statement explains why your colleague cannot locate the drivers?

A. NIC teaming is an advanced feature that is only available on vSphere Distributed Switches.

B. The NIC teaminci drivers for supported network adapters are available from the vSphere software download site.

C. NIC teaming on vSphere Standard Switches does not require any additional drivers.

D. NIC teaming does not require special drivers on the hosts but it does require the installation of a vCenter Server Plugin.

Correct Answer: B

QUESTION 2

Within the NSX architecture, how is the NSX distributed firewall deployed?

A. As a single separate virtual appliance

B. It is embedded in the VMkernel

C. As a virtual appliance on every ESXi host

D. It is installed onto the vCenter Server

Correct Answer: C
