QUESTION 1

Which VMware solution will allow an administrator to manage the migration and deployment of 100 or more desktops from Windows 7 to Windows 8.1 with minimum downtime using a central management console?

- A. VMware Thinapp
- B. VMware Workspace Portal
- C. VMware Mirage
- D. View Administrator

Correct Answer: D

QUESTION 2

The security manager is concerned that users are storing sensitive corporate data in public data sharing services. The manager has these requirements:

Users must be able to share data

Data must be stored in the corporate data center

Administrators should have granular policy-based control of Sharing

Which VMware product meets these requirements?

- A. Virtual SAN
- B. VMware Mirage
- C. Horizon Workspace Portal
- D. Horizon (with View)

Correct Answer: B

QUESTION 3

How are VMware Horizon 6 storage policies applied to virtual desktops that are located on a Virtual SAN distributed datastore?

- A. The policies are automatically and individually applied to non-persistent virtual desktops.
- B. The policies are configured using a Virtual SAN custom storage policy.
- C. The policies are upon deployment of a virtual desktop from a linked clone.
- D. The policies are automatically and individually applied per disk.

Correct Answer: D

QUESTION 4

Several users of a desktop pool are complaining of slow login performance. How can Persona Management improve the pool's performance?

- A. By allowing the VMware administrator to store all user documents and settings directly to a VMFS datastore.
- B. By downloading the user's settings and desktop on demand, rather than downloading the entire configuration at logon.
- C. By frequently saving used files to a local SSD device to improve read performance.
- D. By allowing the user to store their desktop and settings to a USB device to improve recovery.

Correct Answer: B

QUESTION 5

An administrator is attending a planning meeting for a VMware Horizon (with View) deployment and is asked for a definition of end user computing?

How should the administrator respond?

- A. End user computing is the process of granting everyone administrator-level access to their virtual desktop.
- B. End user computing is maintaining the licenses for each software package used within the environment.
- C. End user computing is the process of life cycling everyone's physical desktop every three years.
- D. End user computing is the process of providing data access, regardless of the client platform.

Correct Answer: D
