### QUESTION 1

What two components must be installed and configured to allow RDS hosts to deliver application? (Choose two)

- A. Windows Remote Desktop Services
- B. PCoIP agent
- C. Windows Routing and Remote Access Services
- D. View Agent

Correct Answer: BD

---

### QUESTION 2

Which statement reflects a Security challenge that could be addressed by a new VMwars Horizon (with View) deployment?

- A. We need a centralized way to store data that is under our company's control, regardless of whether the data is stored in local datastores or within a hybrid cloud provided solution.
- B. We want a simple, easy way to provision virtual desktops, determine who gets to use them, and specify who can check them out for remote access.
- C. Some of our sales force do not live anywhere near one of our offices. We'd like to issue them a laptop and manage the physical laptop remotely.
- D. We have a lot of our sales force that rarely work in the office. We need a way to deploy new applications to them and to keep them updated.

Correct Answer: B

---

### QUESTION 3

Which statement represents a Customer Requirement that could be met by implementing a VMware Horizon (with View) deployment?

- A. We need to centralize access to common services and provide a uniform, secure, easy to manage image for employee access.
- B. We want to reduce the amount of hardware in our datacenter by making more.
- C. We are looking for an easy way to recover our user services in the event of unplanned downtime.
- D. We need to centralize our management functionality and be able to quickly and efficiently monitor our datacenter services.

Correct Answer: C

---

#### QUESTION 4

An administrator is concerned about reoccurring licensing issues within their organization. Which product or component will help resolve these issues?

- A. View Administrator
- B. VMware Workspace Portal
- C. Linked Clones
- D. VMware Mirage

Correct Answer: B

---

#### QUESTION 5

A Help Desk engineer has expressed concern about the security of user data in virtual desktop sessions. How is user data protected in View sessions?

- A. Horizon (with View) caches user data in local RAM on each ESXi host to avoid transmission across the network.
- B. Horizon (with View) uses CHAP to protect user data.
- C. Horizon (with View) encrypts user data at the Connection Server and decrypts it with a user-supplied smartcard.
- D. Horizon (with View) encapsulates and encrypts sessions using SSL to protect user data when using PCoIP.

Correct Answer: AD
