**QUESTION 1**

Scenario: A Citrix Administrator would like to delegate administration of the Citrix NetScaler to a Microsoft Active Directory group called ICitrix-NetScaler-Adminsl. The group already exists in Active Directory. The Citrix- NetScaler-Admins group must have full-control permission on the Citrix NetScaler to perform their tasks. The administrator has successfully configured an LDAP authentication server and authentication policy. The authentication policy is already globally bound. How should the administrator proceed on the Citrix NetScaler?

- A. Create an AAA User called Citrix-NetScaler-Admins and select IExternal Authenticationl.
- B. Create a group called Citrix-NetScaler-Admins. Make the group a member of the operator command policy.
- C. Create a group called Citrix-NetScaler-Admins. Make the group a member of the superuser command policy.
- D. Create an AAA group called Citrix-NetScaler-Admins. Create an ALLOW authorization policy and bind it to the Citrix-NetScaler-Admins AAA Group.

Correct Answer: C

QUESTION 2

Scenario: An administrator configures load balancing in an environment to load balance a Web server. The administrator needs to enhance availability in the case that the virtual server goes down.

Which two options could the administrator configure to meet the load balancing needs for this environment? (Choose two.)

- A. Redirect URL
- B. Reversemonitoring
- C. Backup virtual server
- D. Content Switching virtual server

Correct Answer: AC

QUESTION 3

Scenario: An administrator configured a AAA virtual server. The AAA virtual server is NOT yet bound to a traffic management virtual server.

Which two virtual servers could the administrator configure as traffic management virtual servers? (Choose two.)

- A. GSLB

- B. Load balancing
- C. Content switching
- D. NetScaler Gateway

Correct Answer: BC

QUESTION 4

Scenario: A Citrix Administrator needs to install a new certificate on the NetScaler Gateway virtual server. The administrator was provided a new PFX certificate and has imported the PKCS12 file to the NetScaler. What should the administrator do to complete the installation of the certificate?

- A. Create the RSA key and bind to the virtual server.
- B. Install the Cert-Key Pair and bind to the virtual server.
- C. Split the PEM file, install Cert-Key Pair and bind to the virtual server.
- D. Create the CSR and install the Cert-Key Pair, and bind to the virtual server.

Correct Answer: C

QUESTION 5

An administrator needs to implement a solution to provide users with remote access to applications from tablet devices using Citrix Receiver.

Which component is required to fulfill these requirements?

- A. Citrix Web Interface
- B. Citrix Single Sign-on
- C. Citrix Provisioning Services
- D. Citrix Merchandising Server

Correct Answer: D
