**QUESTION 1**

Scenario: A Citrix Engineer is configuring a Buffer Overflow Security Check. When configuring the options, the engineer notices that the Learn Mode is unavailable.

Why is the Learn Mode unavailable in this configuration?

- A. The NetScaler License is at Enterprise.
- B. The Application Firewall database is at 20 MB.
- C. The Application Firewall feature is disabled.
- D. The Learn Mode is NOT available for Buffer Overflow.

Correct Answer: A

QUESTION 2

What can a Citrix Engineer use in NetScaler Management and Analytics System (NMAS) to troubleshoot an issue in which users report long response times when accessing a virtual desktop?

- A. Web Insight
- B. WAN Insight
- C. HDX Insight
- D. Gateway Insight

Correct Answer: A

QUESTION 3

Scenario: A Citrix Engineer is trying to optimize a website that is load balanced on a NetScaler and is accessed by mobile users. The web application is complex and made up of hundreds of embedded images, scripts, and other objects per page. This limitation is creating a significant bottleneck, resulting in excessive load times.

Which NetScaler feature can the engineer use to optimize the web application?

- A. Domain Sharding
- B. SPDY (Speedy)
- C. Multipath TCP
- D. Minification

Correct Answer: A

The leading capability in this category is domain sharding. By default, browsers restrict the number of parallel connections that can be open to any one domain. Typically, fewer than ten are allowed. For complex web applications with hundreds of embedded images, scripts and other objects per page, this limitation can create a significant bottleneck resulting in excessive load times. With domain sharding, NetScaler MobileStream modifies administrator-selected URLs by breaking them into sub-domains to allow client web browsers to open multiple groups of parallel connections. As a result, object-heavy pages are downloaded and can be rendered up to 10 times faster. Also included in this category is cache extension, a capability that leverages advanced browser settings and NetScaler AppCache functionality to further improve performance by maximizing the practice of locally caching static content.

QUESTION 4

A Citrix Engineer has correctly installed and configured the NetScaler Web Logging (NSWL) client but has noticed that logs are NOT being updated.

What could be causing this issue?

- A. The TCP port 3011 is NOT open between the NSWL client and NetScaler.
- B. The NSWL client executable is NOT running on the client.
- C. The NSWL buffer is full on the NetScaler.
- D. An NSIP is missing in the log.conf file

Correct Answer: D

QUESTION 5

Which two threats can be prevented by using IP Reputation? (Choose two.)

- A. Trojan horses
- B. Phishing Proxies
- C. Worm
- D. Compromised IPv6 web-server
- E. Compromised IPv4 web-server

Correct Answer: BE
