QUESTION 1

What are two situations in which XenMobile notification templates are used? (Choose two.)

A. As part of a XenMobile automated action to auto-notify when specified criteria are met.

B. As part of the XenMobile enrollment process to auto-notify user post enrollment.

C. As part of a XenMobile Device policy to auto-notify when a XenMobile policy becomes active.

D. As part of the XenMobile client property policies to auto-notify when client settings are delivered to a device.

Correct Answer: AB

QUESTION 2

What are two scenarios in which a Citrix Engineer must configure Mobile Service Provider (MSP) for XenMobile Mail Manager? (Choose two.)

A. To query unmanaged ActiveSync devices

B. For BES 4 and BES 5 integration

C. To control ActiveSync access for unmanaged devices

D. For BES 10 integration

Correct Answer: AB

QUESTION 3

Which PowerShell command does a Citrix Engineer need to run in order to recover a StorageZone Controller configuration backup?

A. Set-SfConfig

B. Get-SfConfig

C. Join-SfConfig

D. Configure-SfConfig

Correct Answer: A

QUESTION 4

Scenario: User password caching must be disabled in an environment due to an information technology security policy. The security policy also mandates the following:

-

Devices should NOT be allowed to be offline for more than 3 days.

-

Devices should recognize updates to applications in under 24 hours in the event of critical security updates.

-Users should conduct application upgrades within 3 days of a device recognizing the availability of an update.

Which combination of settings should a Citrix Engineer recommend to meet the requirements of the security policy?

A. AD password for authentication; maximum offline period of 24 hours; and app update grace period of 72 hours (3 days)

B. AD password for authentication; maximum offline period of 72 hours (3 days); and app update grace period of 72 hours (3 days)

C. Worx PIN for authentication; maximum offline period of 72 hours (3 days); and app update grace period of 24 hours

D. Worx PIN for authentication; maximum offline period of 24 hours; and app update grace period of 72 hours (3 days)

E. Worx PIN for authentication; maximum offline period of 72 hours (3 days); and app update grace period of 72 hours (3 days)

Correct Answer: A

QUESTION 5

What should a Citrix Engineer do to remove and prevent subsequent access to an unwrapped application that is already installed by a group of users on their iOS devices?

A. Create an app-uninstall policy and assign it to a Delivery Group.

B. Create an app-uninstall policy and assign it to a deployment package.

C. Create an application blacklist and assign it to a deployment package.

D. Change the application to an optional application and assign it to a Delivery Group.

Correct Answer: A
