**QUESTION 1**

Which two factors present a risk to the availability of the CGE environment based on the current provision for external access to it? (Choose two.)

- A. Single-factor authentication is used for external access.
- B. There are single Secure Gateway servers in some locations.
- C. NetScaler Gateway is being used to load balance StoreFront.
- D. There is no automatic failover between regions for end users.

Correct Answer: BD

QUESTION 2

Scenario: The company is designing a cost-efficient environment for the call center workers. The IT department is replacing the existing thin clients with newer models.

How should the architect recommend that the Synchronizer be deployed?

- A. By deploying a Hyper-V virtual appliance
- B. By installing the Synchronizer software on a Hyper-V server
- C. By installing a Synchronizer virtual appliance on XenServer
- D. By booting from the Synchronizer ISO image

Correct Answer: C

QUESTION 3

Scenario:

CGE acquires a small energy company that is running MGMT, a proprietary 16-bit application. A Citrix Architect is tasked with deploying this application to the Executives/Management end-user group. The CIO mandates that a FlexCast

model must be chosen that resembles this end-user group's existing delivery strategy.

It is important that a single-image deployment is utilized and that management effort is kept to a minimum for the update process. The availability of a fast rollback plan must also be available after upgrades, since it can often result in system instability.

Why is deploying MGMT in a Hosted Shared environment on Windows Server 2012 R2 with Provisioning Services the best solution?

- A. It offers a faster change process.

- B. End users are already comfortable working in a shared environment.
- C. It prevents XenApp server crashes.
- D. It enables faster rollbacks.

Correct Answer: D

QUESTION 4

Why is a design with 12 NetScaler appliances, in which each datacenter deploys six NetScaler virtual servers in HA pairs, configured with the subnets of the three sites and binded to redirection policies that are configured in ICA Proxy mode using StoreFront, the best remote access design?

- A. It allows end users to connect to their primary datacenter through a secure, reliable, and cost-effective solution.
- B. It provides redundancy, while optimizing external WAN traffic.
- C. It segments the Gateway and load-balancing features of the NetScaler appliances.
- D. It allows for the expected expansion of remote access usage and provides SSL VPN functionality for future needs.

Correct Answer: C

QUESTION 5

An architect is designing a solution that minimizes the storage footprint by utilizing thin provisioning in the datacenter. Which solution should the architect recommend for XenServer shared storage?

- A. NFS
- B. CIFS
- C. iSCSI
- D. Fibre Channel

Correct Answer: A
