QUESTION 1

Scenario: A Citrix Architect needs to design a new XenApp and XenDesktop environment.

The architect has identified the User Layer requirements, as shown in the Exhibit. Click the Exhibit button to view the requirements.

User Group	User Devices	Connection Point	Security Requirements
Accountants	Corporate-owned desktops, laptops	Internal	Should minimize user effort required to authenticate while meeting general security requirements
Sales Associates	BYOD smartphones, tablets	Internal and External	Should minimize user effort required to authenticate while meeting general security requirements
Customers	Public kiosks	Internal	Use kiosks to access a published app hosted by a group of servers in an isolated network segment Should NOT have knowledge of Workspace Services credentials
Contractors	BYOD desktops, laptops	External	Should NOT have knowledge of Workspace Services credentials and must supply their own authentication provider Should NOT have knowledge of Workspace Services credentials and must supply their own authentication provider.

Additionally, management at the organization has identified the following general Access Layer

requirements:

A multi-factor authentication method is required for any connections to the XenApp and XenDesktop

environment originating from outside the corporate network.

External connections must be authenticated by a NetScaler Gateway virtual server located in a DMZ

network.

Internal connection traffic should NOT leave the internal corporate network.

Which Access Layer feature should the architect configure to meet the security requirements of the

Accountants group?

A. Unified Gateway

B. SmartAccess

C. SmartControl

D. NetScaler Double Hop

E. Endpoint analysis scan

Correct Answer: B

QUESTION 2

Scenario: While assessing User Layer, a Citrix Architect finds that most of the internal users connect using corporate-owned laptops, desktop devices, and thin clients. Many of these laptops and desktop devices are running Windows 10, while the remainder of the machines are running Windows 7 and are in the process of being migrated to Windows 10. Some users also connect using personal devices.

Currently, Citrix Receiver is manually installed on any endpoint device added to the company. All these devices use Citrix Receiver version 4.8 and above. The IT team is planning to automate a process to update all the devices with the latest version of Citrix Receiver and to automate another process for automatic installation of Citrix Receiver without incurring extra costs and maintenance.

The architect needs to identify which type of Citrix Receiver to recommend for 25 task workers in a remote location where installation of Citrix Receiver is NOT possible. The workers do NOT require any device mappings.

Which type of Citrix Receiver should the architect recommend?

A. Native receiver

B. Receiver for Web

C. Receiver for Chrome

D. HTML 5

Correct Answer: B

QUESTION 3

Scenario: A Citrix Architect is reviewing a XenApp and XenDesktop design for an environment with multiple Active Directory forests.

Click the Exhibit button to view the design details.

Which risk should the architect highlight to the customer, based on the details listed in the Exhibit?

A. The SupportMultipleForest registry key is NOT supported.

B. The Active Directory trust method is NOT supported.

C. The Active Directory functional level is NOT supported.

D. The DNS lookup strategy is NOT supported.

Correct Answer: C

QUESTION 4

Scenario: A Citrix Architect needs to design a new XenApp and XenDesktop environment.

The architect has identified the Resource Layer requirements shown in the Exhibit.

Click the Exhibit button to view the requirements.

User Group	Do user settings need to persist?	Assigned FlexCast model	Access required to profile folders?	Additional Requirements
Accountants	Yes	Published apps	No	No
Executives	Yes	Remote PC	Yes, the following folders should be available: • Contacts • Desktop • Downloads • Favorites • My Documents	Profile data should be preserved even if resource machine fails. Solution must NOT require anything to be installed on the Remote PCs.
Graphic Designers	Yes	Hosted VDI (Static / persistent, uses vGPU)	Yes, the following folders should be available: • Contacts • Desktop • Favorites • My Documents • My Pictures • My Videos	Need to ensure application data is NOT lost if the application crashes
Customer Service	No	Published Desktop (Server OS)	No	No

Which feature of Citrix Profile Management could help the architect address the Graphic Designers group requirements?

A. Profile caching

B. Profile streaming

C. File exclusions

D. Active Write Back

Correct Answer: D

QUESTION 5

Scenario: A Citrix Architect is designing hardware requirements for a small production XenApp and XenDesktop environment.

Requirements: Access to the environment hosted in a single datacenter Ability to perform maintenance on the environment without requiring an outage

Which hardware requirement does the architect need to include for hypervisor hosts in order to meet the customer\\'s needs?

A. Multiple individual hypervisor hosts in the same datacenter

B. Separate hypervisor cluster/pool in an alternate datacenter

C. Separate hypervisor clusters/pools in the same datacenter

D. N+1 hypervisor hosts in a single cluster/pool

Correct Answer: C
