**QUESTION 1**

An administrator of a XenApp 6.5 environment needs to determine which printer drivers are native to the operating system and which ones are provided by the vendor.

Which two can the administrator use to find this information? (Choose two.)

- A. AppCenter
- B. PnPUtil.exe
- C. Print Detective
- D. Configuration Logging report

Correct Answer: BC

QUESTION 2

Scenario: A XenApp administrator must recommend a database option for the new XenApp 6.5 data store. The new farm will have more than 100 XenApp servers and 500 published resources, support more than 5,000 concurrent users and have two zones separated by a WAN connection.

Which two database options should the administrator recommend? (Choose two.)

- A. IBM DB2 9.7
- B. Oracle Enterprise 11.1
- C. Microsoft SQL Server 2008
- D. Microsoft SQL Server Express 2008

Correct Answer: BC

QUESTION 3

Scenario: The User Support Desk will be taking on frontline troubleshooting of the Citrix farms in response to user issues. The administrator wants the Support Desk staff to do basic user troubleshooting without having production server farm permissions. All users are added to an appropriate Active Directory group. Which step must the administrator take in the AppCenter to meet the requirements of the scenario?

- A. Assign Custom permissions
- B. Assign Full Administration permissions
- C. Assign the users to Read-Only permissions
- D. Assign a Custom Group Policy Object to the organizational unit of the group

Correct Answer: A

**QUESTION 4**

An administrator is using the AppCenter to control the logon settings for a XenApp 6.5 farm.

Which four of the listed options are valid logon control settings for servers in the AppCenter? (Choose four.)

- A. Drain
- B. Prohibit logons only
- C. Drain until next restart
- D. Allow logons and reconnections
- E. Prohibit logons until server restart
- F. Prohibit logons and reconnections

Correct Answer: BDEF

QUESTION 5

Scenario: An administrator is creating a new XenApp farm. The farm will use hosted applications and applications streamed using Microsoft App-V technology. Both Microsoft Windows and Apple OS X computers are in use in the environment. Management requires an automated process to deliver all necessary clients and plug-ins.

Which two components should the administrator use to automate the process of delivering and updating client plug-ins? (Choose two.)

- A. Microsoft Group Policy
- B. Citrix Receiver Updater
- C. Citrix Merchandising Server
- D. Apple Enterprise Management Software
- E. Microsoft System Center Configuration Manager

Correct Answer: BC
