QUESTION 1

Scenario: An administrator set up a NetScaler in an HA configuration. When the Primary node was rebooted due to a power failure, the failover did NOT occur as expected.

Which configuration settings must have prevented the failover in the above scenario?

A. Primary node is set to fail-safe mode.

B. Primary node is set to stay secondary.

C. Secondary node is set to do not failover.

D. Secondary node is set to stay secondary.

Correct Answer: D

QUESTION 2

What must an administrator configure when adding a new SNMP manager to a NetScaler configuration using the Configuration Utility?

A. Source port

B. SNMP community string

C. Source Interface Number

D. SNMP manager IP address

E. SNMP Trap Type (Basic or Advanced)

Correct Answer: D

QUESTION 3

An administrator is determining when a particular service was unavailable in the past due to a failure condition detected by the assigned monitor.

Which NetScaler Configuration Utility option would report the service states detected in the past?

A. View events

B. Memory usage

C. View dmesg boot

D. TCP/IP Connections

E. View console messages

Correct Answer: A

QUESTION 4

Scenario: An administrator has configured an SNMP manager to allow an engineer with the IP address

192.168.1.1 to perform SNMP queries on the NetScaler appliance. However, the engineer has been promoted to another position and has delegated SNMP management to another engineer who will manage the box from 192.168.1.5.

Which two steps are required for the administrator to allow the new engineer to manage the box? (Choose two.)

A. Add SNMP Manager 192.168.1.5.

B. Add SNMP Community 192.168.1.5.

C. Remove SNMP manager 192.168.1.1.

D. Remove SNMP Community 192.168.1.1.

Correct Answer: AC

QUESTION 5

Scenario: A customer has two datacenters in geographically dispersed locations, both serving content for a web-based application. Content for both datacenters should always be available.

Which method should an administrator use to make content from both datacenters available at all times?

A. HA

B. GSLB

C. Content switching

D. Backup load balancing virtual servers

Correct Answer: B
