### QUESTION 1

Which set of statements is true about data dictionary views?

1.  
They are stored in the SYSTEM tablespace.
  2.  
They are based on virtual tables.
  3.  
They are owned by the SYS user.
  4.  
They can be queried by a normal user only if the `07_DICTIONARY_ACCESSIBILITY` parameter is set to TRUE.
  5.  
The `V$FIXED_TABLE` view can be queried to list the names of these views.
  6.  
They are owned by the SYSTEM user.
- A. 2, 5, and 6  
B. 1, 2, and 3  
C. 1 and 3  
D. 2, 3, 4, and 5

Correct Answer: C

### QUESTION 2

You want to create a database with a block size other than the default 8 kilobytes (KB) by using the Database Configuration Assistant (DBCA).

Which option should you use?

- A. Automatic Storage Management (ASM) for storage of data files
- B. a file system for storage of data files
- C. a Data Warehouse database template

D. a custom database template

Correct Answer: D

---

### QUESTION 3

Your database has the SRV1 service configured for an application that runs on middle-tier application server. The application has multiple modules. You enable tracing at the service level by executing the following command:

```
SQL > exec DBMS_MONITOR.SERV_MOD_ACT_TRACE_ENABLE ('SRV1\');
```

The possible outcome and actions to aggregate the trace files are as follows:

1.

The command fails because a module name is not specified.

2.

A trace file is created for each session that is running the SRV1 service.

3.

An aggregated trace file is created for all the sessions that are running the SRV1 service.

4.

The trace files may be aggregated by using the trcess utility.

5.

The trace files be aggregated by using the tkprof utility.

Identify the correct outcome and the step to aggregate by using tkprof utility?

A. 1

B. 2 and 4

C. 2 and 5

D. 3 and 4

E. 3 and 5

Correct Answer: B

Tracing information is present in multiple trace files and you must use the trcess tool to collect it into a single file.

Incorrect:

Not 1: Parameter service\_name

Name of the service for which tracing is enabled.

module\_name

Name of the MODULE. An optional additional qualifier for the service.

Note:

\*

The procedure enables a trace for a given combination of Service, MODULE and ACTION name. The specification is strictly hierarchical: Service Name or Service Name/MODULE, or Service Name, MODULE, and ACTION name must be specified. Omitting a qualifier behaves like a wild-card, so that not specifying an ACTION means all ACTIONS. Using the ALL\_ACTIONS constant achieves the same purpose.

\*

SERV\_MOD\_ACT\_TRACE\_ENABLE Procedure

This procedure will enable SQL tracing for a given combination of Service Name, MODULE and ACTION globally unless an instance\_name is specified.

\*

```
DBMS_MONITOR.SERV_MOD_ACT_TRACE_ENABLE(  
service_name IN VARCHAR2,  
module_name IN VARCHAR2 DEFAULT ANY_MODULE,  
action_name IN VARCHAR2 DEFAULT ANY_ACTION,  
waits IN BOOLEAN DEFAULT TRUE,  
binds IN BOOLEAN DEFAULT FALSE,  
instance_name IN VARCHAR2 DEFAULT NULL);
```

---

#### QUESTION 4

Which four statements are true about database instance behavior? (Choose four.)

- A. An idle instance is created when a STARTUP NOMOUNT is successful
- B. All dynamic performance views (v\$ views) return data when queried from a session connected to an instance in NOMOUNT state
- C. The consistency of redo logs and data files is checked when mounting the database
- D. Redo log files can be renamed in MOUNT state
- E. An SPFILE can be updated when connected to an idle instance
- F. Datafiles can be renamed in MOUNT state

Correct Answer: CDEF

---

#### QUESTION 5

Which component resides in the System Global Area (SGA) of a database instance only in shared server connections?

- A. User Global Area
- B. Program Global Area
- C. SQL Query Result Cache
- D. PL/SQL Function Result Cache

Correct Answer: A
