**QUESTION 1**

View the Exhibit and examine the description of the ORDERS table.

Which two WHERE clause conditions demonstrate the correct usage of conversion functions? (Choose two.)

- A. WHERE order_date IN (TO_DATE('OCT 21 2003','MON DD YYYY'), TO_CHAR('NOV 21 2003','MON DD YYYY'))
- B. WHERE order_date > TO_CHAR(ADD_MONTHS(SYSDATE,6),'MON DD YYYY')
- C. WHERE TO_CHAR(order_date,'MON DD YYYY') = 'JAN 20 2003'
- D. WHERE order_date > TO_DATE('JUL 10 2006','MON DD YYYY')

Correct Answer: CD

QUESTION 2

Which two statements are true about indexes and their administration in an Oracle database? (Choose two.)

- A. A new index can be created or an existing one reused when a primary key constraint is created.
- B. An INVISIBLE index is maintained by DML operations on the underlying table.
- C. If a query filters on an indexed column, the index will always be accessed during execution of the query.

D. A DROP INDEX statement always prevents updates to the table during the drop operation.

E. The same table column cannot be part of a unique and non-unique index.

Correct Answer: AB

QUESTION 3

Which three statements are true about performing DML operations on a view with no INSTEAD OF triggers defined? (Choose three.)

A. Views cannot be used to query rows from an underlying table if the table has a PRIMARY KEY and the PRIMARY KEY columns are not referenced in the defining query of the view.

B. Delete statements can always be done on a table through a view.

C. The WITH CHECK clause has no effect when deleting rows from the underlying table through the view.

D. Views cannot be used to add rows to an underlying table if the table has columns with NOT NULL constraints lacking default values which are not referenced in the defining query of the view.

E. Views cannot be used to add or modify rows in an underlying table if the defining query of the view contains the DISTINCT keyword,

F. Insert statements can always be done on a table through a view.

Correct Answer: CDE

QUESTION 4

No-user-defined locks are used in your database.

Which three are true about Transaction Control Language (TCL)?

A. COMMIT erases all the transaction's savepoints and releases its locks.

B. COMMIT ends the transaction and makes all its changes permanent.

C. ROLLBACK without the TO SAVEPOINT clause undoes all the transaction's changes but does not release its locks.

D. ROLLBACK to SAVEPOINT undoes the transaction's changes made since the named savepoint and then ends the transaction.

E. ROLLBACK without the TO SAVEPOINT clause undoes all the transaction's changes, releases its locks, and erases all its savepoints.

F. ROLLBACK without the TO SAVEPOINT clause undoes all the transaction's changes but does not erase its savepoints.

Correct Answer: ABE

QUESTION 5

The ORDERS table has a primary key constraint on the ORDER_ID column.

The ORDER_ITEMS table has a foreign key constraint on the ORDER_ID column, referencing the primary key of the ORDERS table.

The constraint is defined with on DELETE CASCADE.

There are rows in the ORDERS table with an ORDER_TOTAL less than 1000.

Which three DELETE statements execute successfully?

- A. DELETE order_id FROM orders WHERE order_total
- B. DELETE orders WHERE order_total
- C. DELETE * FROM orders WHERE order_total
- D. DELETE FROM orders;
- E. DELETE FROM orders WHERE order_total

Correct Answer: BDE
