-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

Which two are prerequisites for performing Flashback Transaction?

- A. Fast Recovery Area must be enabled for the database
- B. The EXECUTE privilege must be granted to a user on the DBMS_FLASHBACK package.
- C. Undo retention guarantee must be configured for the database.
- D. A supplemental log must be enabled for the primary key.
- E. A supplemental log must be enabled for the primary key.

Correct Answer: BD

QUESTION 2

Which three resources are always shared among CDB\$ROOT and pluggable databases (PDBs)? (Choose three.)

- A. the data dictionary in CDB\$ROOT
- B. temporary tablespaces
- C. the Process Monitor Process (PMON)
- D. SYSAUX tablespaces
- E. the log writer process (LGWR)
- F. undo tablespaces

Correct Answer: ACE

QUESTION 3

Examine this output of an export from the current release of an Oracle multitenant database: \$ sqlplus system/oracle .
SQL> col name for a10 SQL> select name, open_mode from v\$pdb; NAME OPEN_MODE
-----PDB\$SEED READ ONLY PDB1 READ WRITE PDB2 MOUNTED SQL> exit Next you
execute: \$ expdp system/oracle full=y

What is the outcome?

- A. It fails because Data Pump cannot be container.
- B. It creates a full export of the root
- C. It creates a full export of the root

D. It creates a full export of only the used while connected to the root container and PDB1. container and all PDBs. container and all open PDBs. root container.

Correct Answer: A

QUESTION 4

While backing up to an SBT channel, you determine that the read phase of your compressed Recovery Manager (RMAN) incremental level 0 backup is a bottleneck.

FORCE LOGGING is enabled for the database.

Which two could improve read performance? (Choose two.)

- A. Increase the size of tape I/O buffers.
- B. Disable FORCE LOGGING for the database.
- C. Increase the size of the database buffer cache.
- D. Enable asynchronous disk I/O.
- E. Increase the level of RMAN multiplexing.

Correct Answer: DE

In RMAN operation, asynchronous Disk I/O is always better than synchronous I/O as a server process can begin an I/O and then perform other work while waiting for the I/O to complete. On operating systems that do not support native asynchronous I/O, the database can simulate it with special I/O slave processes (DBWR_IO_SLAVES)

QUESTION 5

Which three are true about patchsets? (Choose three.)

- A. They can be applied in a rolling fashion for Clusterware and the databases.
- B. They can introduce new features.
- C. They are installed via OPatch or OPatchAuto.
- D. Installing a patchset is considered an "upgrade".
- E. They are only released quarterly.
- F. A base release is not needed to install patchsets.

Correct Answer: BDF

BDF

- A. They can be applied in a rolling fashion for Clusterware and the databases.

False - Can be applied rolling for clusterware only, because that's the only one we have multiple environments. Not for

databases.

B. They can introduce new features.

Correct

C. They are installed via OPatch or OPatchAuto.

False - We can install via the OUI, the Oracle Universal Installer

D. Installing a patchset is considered an upgrade.

Correct - We can install via the OUI, the Oracle Universal Installer, considered an upgrade for that.

E. They are only released quarterly.

False - Its about PSU . They are released quarterly. Apply it on top of any given patch set. So they are cumulative patches.

F. A base release is not needed to install patchsets.

Correct - Full releases start with 11g R2. Don't carry a base release
