QUESTION 2

Your client has implemented Oracle Cloud Applications with their United States business unit and United Kingdom business unit. After six months, they acquired another company in China and added a China business unit. A project accountant in your organization is authorized to access transactions for the US, UK, and China business units. The project accountant can see the transactions for the US and UK business units but not for the China business unit.

Why is the project accountant unable to see the transactions for the China business unit?

A. Data Access for the China business unit has not been assigned to the user against the relevant job role.

B. The China business unit is associated with a different legal entity than the US and UK business units.

C. The job role relevant to the China business unit is not assigned to the project accountant.

D. The US and UK business units are linked to different ledges than the China business unit.

Correct Answer: B

QUESTION 3

You search for resources to fulfill a project resource request but are unable to proceed after receiving the following error message: "The search for resources cannot be completed because the project resource search index is not available. Contact your help desk." Identify the cause for this error message.

A. The index has been built.

B. The most recent update of the index finished successfully.

C. The index is not in the process.

D. The index is in the process of being updated.

Correct Answer: C

QUESTION 4

You create a contract with two contract lines: Line 1 and Line 2. You create separate bill plans: A for contract Line 1 and B for contract Line 2, with a different bill set number (11 for Bill Plan A and 22 for Bill Plan B). Then Bill Plan A is allocated against Project X - Task 10, and Bill Plan B is allocated against Project Y - Task 30.

Based on the preceding setup, you are generating invoices. Identify two correct statements about invoice generation in this scenario.

A. Invoice generation does not depend on bill plan. The invoices are created based on the contract line.

B. Both the contract lines create only a single invoice because they are using the same contract.

C. Two invoices are created using the same contract.

D. Bill set number drives the grouping of transactions.

Correct Answer: AC

QUESTION 5

Your client uses Resource Breakdown Structures (RBS) and Resource Mapping to associate amounts to resources. After making some changes to the resources at project level, forecasts are regenerated. After reviewing the cost amounts associated with the resources, you suspect that the cost association does not match your client\'s expectations.

Identify two valid rules based on which cost association works.

A. If the sum of precedence numbers is the same for more than one branch, precedence is given to the branch with the lowest number at the lowest level.

B. If there is only one level in RBS to which the transaction maps, the cost amounts are mapped to that level.

C. If a transaction maps to more than one level, Oracle PPM Cloud sums the precedence numbers for all resource types in the branch, and gives precedence to the resource element in the branch with the highest sum.

D. If one branch contains a user-defined resource type, precedence is given to the branch that contains a user -defined resource type.

Correct Answer: AD
