**QUESTION 1**

You are accessing the service catalog to create service connections. You notice that there are no services listed in the catalog. Which two points do you need to verify to mitigate this issue?

- A. Verify from the Visual Builder Studio home page that the service catalog connection is live.
- B. Verify with your Oracle Representative that access to the service catalog is a part of your enterprise's Visual Builder Studio contract.
- C. Determine if the backend service has been properly defined.
- D. Check that you have the proper credentials allowing access to the service catalog.
- E. Check that the network connection between the Visual Builder Studio and the service catalog is functional.

Correct Answer: CD
