**QUESTION 1**

A customer has four external systems: Consumer Loan, Auto Loan, Home Loan and Insurance. Functional users are allowed to process and view transactions and accounting for all these systems.

Which two implementations allow similar accounting rules to be shared?

- A. One subledger for the 3 Loan systems and one subledger for Insurance.
- B. One subledger for each source system.
- C. One subledger for all 4 source systems.
- D. One subledger for Consumer Loan and Auto Loan, and one subledger for Home Loan and Insurance.

Correct Answer: AC

QUESTION 2

While creating a journal entry rule set you are NOT able to use an account rule that was created recently.

Which two reasons can explain this?

- A. The account rule is using sources that have not been assigned to the same event class that is associated to the journal entry rule set.
- B. The account rule is defined with conditions that are not allowing the assignment.
- C. The account rule does not return any valid account value.
- D. The account rule is defined with a different chart of accounts from the journal entry rule set.

Correct Answer: AD

QUESTION 3

Given the business use case:

\\New Trucks\\ runs a fleet of trucks in a rental business In the U.S. The majority of the trucks are owned; however, in some cases, \\New Truck\\ may procure other trucks by renting them from third parties to their customers. When trucks are leased, the internal source code is \\L\\. When trucks are owned, the internal source code is \\O\\. This identifies different accounts used for the Journal entry. Customers sign a contract to initiate the truck rental for a specified duration period. The insurance fee is included in the contract and recognized over the rental period. For maintenance of the trucks, the "New Trucks* company has a subsidiary company \\Fix Trucks\\ that maintains its own profit and loss entity. To track all revenue, discounts, and maintenance expenses, \\New Trucks\\ needs to be able to view: total maintenance fee, total outstanding receivables, rental payment discounts, and total accrued and recognized insurance fee income.

How do you set up an account rule that is based on leased and owned trucks?

- A. Set up a mapping set rule.

- B. Set up a lookup value.
- C. Set up a value set rule.
- D. Set up an account source in the source system file and derive the value.

Correct Answer: A

QUESTION 4

You need to build a complex account rule. Which four value types can you use in your definition?

- A. Value Set
- B. Constant
- C. Existing Account Rule
- D. Account Combination
- E. Mapping Set
- F. Source

Correct Answer: BCEF

QUESTION 5

What is a user job role data context assignment?

- A. Security privileges assignment to a user job role
- B. Security data role context assignment to a user job role
- C. Security data access context assignment to a user job role
- D. Duty role context assignment to a user

Correct Answer: C
