**QUESTION 1**

Work order costs are computed based on material and resource transactions reported and the cost method of the product. In a manufacturing plant, the production operator has completed a work order WO001 ensuring proper materials and resource transactions. The materials are costed and resources are defined with rates. A cost accountant has created cost accounting distributions. Upon reviewing the accounting distributions of the work order WO-001, resources charged to the work order are missing. Identify the Concurrent Request that needs to be submitted to transfer resource charges to cost accounting.

- A. Create accounting
- B. Transfer Transactions from Production to Costing
- C. Transfer Transactions from Inventory to Costing
- D. Transfer Costs to Cost Management

Correct Answer: B

QUESTION 2

As part of an implementation project, you have to perform setups related to a Manufacturing plant in Functional Setup Manager.

What must be set up first in order for you to configure the setup task called Manage Plant Parameters?

- A. The Supply Chain Orchestration Functional Area
- B. The Manufacturing Master Data Functional Area
- C. The Manage Items Profile Options tasks
- D. The Manage product and Child Value Sets task

Correct Answer: B

QUESTION 3

Identify the three sources from which supply chain orchestration (SCO) can create the work orders.

- A. Order Management
- B. Quality
- C. Inventory Min-Max Planning
- D. Procurement
- E. Planning

Correct Answer: ADE

**QUESTION 4**

Your customer is a light assembly manufacturing company that doesn't require shop floor control. A manufacturing engineer wants to generate a work definition automatically for some items, and wants to eliminate the explicit maintenance of work definitions. Which three steps must be completed and verified in the Work Definition area?

- A. Ensure the predefined work definition name ORA_MAIN name is active.
- B. Select a resource that is to be used in automatic work definition by enabling the attribute Default for automatic work definition.
- C. Select a standard operation that is to be used in automatic work definition by enabling the attribute Default for automatic work definition.
- D. Ensure the item is a standard item with a secondary item structure.
- E. Ensure there is only one default standard operation at a given point in time.

Correct Answer: ACD

QUESTION 5

A Production Operator needs to load Work Order Transactions from an external system into Manufacturing Cloud.

Identify the correct sequence of tasks to be performed.

- A. Load Data to Fusion repository> Export File to UCM server > Process Import Operations Transactions> Load file from UCM to Interface table.
- B. Export File to UCM server> Load Data to Fusion repository> Process Import Operations Transactions> Load file from UCM to Interface table.
- C. Load Data to Fusion repository> Export File to UCM server > Load file from UCM to Interface table >Process Import Operations Transactions.
- D. Load Data to Fusion repository> Load File from UCM to Interface table> Export File to UCM server> Process Import Operations Transactions.

Correct Answer: B
