**QUESTION 1**

Which two attributes can you use to group shipment lines into a single shipment? (Choose two.)

- A. Carrier
- B. FOB
- C. Item
- D. Sales Order
- E. Ship-to location

Correct Answer: BE

A shipment comprises a set of shipment lines, grouped by certain common shipping attributes, that are scheduled to be shipped to a customer's ship-to location on a specific date and time. You can include items from different sales orders in a shipment. You can either manually or automatically group shipment lines to create a shipment. The shipment lines are grouped by the mandatory default criteria: ship-from location and ship-to location. However, you may also include additional grouping criteria, such as customer, freight terms, FOB (Free on board), and shipping method.

QUESTION 2

Which two statements are true about the functional capabilities of Oracle Cloud Configurator? (Choose two.)

- A. For users who do not have access to Oracle Fusion Product Hub, Oracle provides an alternative option to create models directly in the workspace area.
- B. Only the optional structure and attributes of a Product Item are imported from Product Hub to Configurator and not the mandatory elements because they cannot be configured by an end user.
- C. Multiple drafts of the same model can be modified at the same time, but they must be in different workspaces.
- D. The user interface pages are tightly connected to the model. You cannot add, delete, or reorder pages without affecting the model structure.

Correct Answer: BC

"Configurator models are imported from items maintained in Oracle Fusion Product Hub (which is accessed by the Product Information Management work area) that have a Structure Type of Model. Only the optional structure and attributes of the product item are imported, because the required elements of the product item cannot be configured by an end user. The option classes and optional standard items for each model item are also imported." "Configurator models are versioned objects. A model can go through multiple drafts before being released in a series of versions. There can be multiple drafts of the same model being modified at the same time, but they must be in different workspaces. A message notifies you if you add a model to a workspace when another draft exists in another workspace. There can only be a single released version of a model with the same effective start date."

QUESTION 3

You are revising a sales order by manually scheduling the following fulfillment line and splitting it. Which three order

attributes can be updated for the split line? (Choose three.)

Order	Fulfillment Line	Item	Item Description	Ordered Quantity	UOM	Order Line	Status	Warehouse	Orchestration Process Name	Unit Selling Price	Shipping Method	Scheduled Ship Date
74263	42370	CM6755020	8" Black Case with Bluetooth Keyboard	10	Ea	1	Manual Scheduling Required	Atlanta	DOO_OrderFulfillmentGenericProcess	17.00USD	DHL AIR Next day air	4/24/2016 19:00

- A. Fulfillment Line shipment method
- B. Fulfillment Line warehouse
- C. Fulfillment Line scheduled ship date
- D. Fulfillment Line unit selling price
- E. Fulfillment Line quantity

Correct Answer: ABE

QUESTION 4

Which four options apply to the "Lead Time" mode? (Choose four.)

- A. Lead time can be specified in multiple ways.
- B. The item is promised on the requested date irrespective of availability.
- C. Calendars and transit time constraints are respected.
- D. No supply availability search is performed.
- E. The order promising engine does not generate any pegging.

Correct Answer: ACDE

QUESTION 5

Your company is in the business of selling kitchen appliances.

Which three entities can you include while defining pricing rules that control how Oracle Pricing Cloud calculates the price for each time? (Choose three.)

- A. Shipping change lists
- B. Discount List
- C. Pricing Profile
- D. Pricing Strategy

E. Cost List

Correct Answer: ABE
