### QUESTION 1

For which two of these purposes can you use model views?

- A. To create analysis views for specific slices of data
- B. To assign data grants to specific slices of data
- C. To filter the results when tracing allocations or performing rule balancing
- D. When mass editing rules, to limit the edits to a subset of the data
- E. When copying POVs, to limit the copy to a subset of the data

Correct Answer: AE

---

### QUESTION 2

Which two are valid statements about Profitability and Cost Management application requirements?

- A. Changes to Profitability and Cost Management dimensions must be deployed to the underlying Essbase database before running allocations.
- B. You must have access to a separate instance of Oracle Analytics Cloud (Essbase) to use as the underlying data storage for Profitability and Cost Management.
- C. You can configure the underlying Essbase database as either a Block Storage (BSO) type or Aggregate Storage (ASO) type.
- D. Applications must have a Point of View with Year, Period, and Scenario dimensions.
- E. An EPM Cloud service instance can support only one Profitability and Cost Management application at a time.

Correct Answer: BD

---

### QUESTION 3

Which three components are required to create a valid rule set?

- A. Using Global Context defined in POV
- B. Rule Set execution method
- C. Rule Set Name
- D. Sequence
- E. Defined rule set context

Correct Answer: BCD

---

#### QUESTION 4

You are creating a rule set for allocation rules. On the description tab, you select Use Global Context. Which two statements are true?

- A. You can override the global context dimension selections at the rule set level.
- B. When you select Use Rule Set Context for a rule In this rule set, the dimension-member combinations defined In the Global Context section are also applied.
- C. At the rule level, the Rule Context tab is where you can edit any default contexts applied to the rule.
- D. On the Context tab for the rule set, you define default members for use In all rules added to the rule set.

Correct Answer: BC

---

#### QUESTION 5

Which two statements are true about model validation?

- A. You cannot deploy the application if model validation returns Invalid conditions.
- B. Model validation validates rules, rule sets, and dimensions.
- C. Running a model validation displays an error table with Information about Invalid conditions.
- D. After the application is deployed, it can detect invalid model artifacts if changes are made to dimensions.

Correct Answer: BC
