QUESTION 1

Which two are valid statements about Profitability and Cost Management application requirements?

- A. Changes to Profitability and Cost Management dimensions must be deployed to the underlying Essbase database before running allocations.
- B. You must have access to a separate instance of Oracle Analytics Cloud (Essbase) to use as the underlying data storage for Profitability and Cost Management.
- C. You can configure the underlying Essbase database as either a Block Storage (BSO) type or Aggregate Storage (ASO) type.
- D. Applications must have a Point of View with Year, Period, and Scenario dimensions.
- E. An EPM Cloud service instance can support only one Profitability and Cost Management application at a time.

Correct Answer: BD

QUESTION 2

Which type of application is created in Profitability and Cost Management?

- A. Management Ledger
- B. Financial
- C. Standard
- D. Cost
- E. Detailed

Correct Answer: C

QUESTION 3

You validate your Profitability and Cost Management application build but receive an error. Which three are possible reasons of the validation failure?

- A. You only had one dimension defined as a point of view dimension.
- B. You did not have at least one member in all dimensions.
- C. You did not include at least one Business dimension.
- D. After the main hierarchy was defined, the dimension contained alternate hierarchy with shared members.
- E. A stored hierarchy contained members with member formulas.

Correct Answer: ACE

QUESTION 4

Which three are valid functions of logic accounts In Data Management?

- A. Logic accounts allow the mapping of a source account based on its value (conditional mapping).
- B. Logic accounts can perform arithmetic operations on source values (arithmetic mapping).
- C. Logic accounts determine how the source fields are stored In the Data Management staging tables (storing mapping).
- D. Simple logic groups enable you to derive logic items front any combination of dimensions (derived mapping).
- E. Logic accounts allow the mapping of one source account to multiple target accounts (statistical mapping).

Correct Answer: BCE

QUESTION 5

Which two statements are TRUE about cloning snapshots?

- A. You cannot clone a snapshot to a target In a different Identity Domain from the source.
- B. You can select any snapshot from the source environment to clone to the target environment.
- C. After cloning, the daily maintenance start time of the target environment Is reset to that of the source environment.
- D. The cloning process deletes any existing application and uploaded files from the target environment.

Correct Answer: BD
