-  **800,000+** Satisfied Customers

**QUESTION 1**

What HDFS replication factor can be used with Block Volumes to optimize cost?

- A. 3
- B. 1
- C. 4
- D. 2

Correct Answer: D

QUESTION 2

A file system is built using BM.Standard2.52 Compute shape for File Servers. One 25 Gbps NIC/network card is used to connect to 10 Block Volumes of 1TB each (max. 4#0MB/s per volume). The other 25 Gbps NIC is used for sending/receiving data to/from client nodes.

File system client instances which mount the file system are provisioned using VM.Standard2.16 Compute shapes. (Network bandwidth: 16.4Gbps(2050 MB/s))

What is the max IO theoretical throughput a client node can get?

- A. 2050 MB/s
- B. 4800 MB/s
- C. 3125 MB/s
- D. 6250 MB/s

Correct Answer: C

QUESTION 3

A Linux visualization instance is in a public subnet with security list 0.0-0.0/0 for TCP port 22. What other rule do you absolutely need to be able to connect remotely?

- A. Open all protocols for your specific IP address.
- B. Create a Stateless Egress rule for port 22
- C. Open TCP ports 5900 to 5910 for 0.0.0.0/0.
- D. No other additional rules are needed. It is possible to connect as is.

Correct Answer: C

QUESTION 4

You are comparing different processors for Monte-Carlo simulation with millions of single core executions. What frequency will have the highest impact on the "time to solution" ?

- A. All Core Turbo Frequency
- B. Base Frequency
- C. Only the network throughput will influence Monte Carlo simulations.
- D. Turbo Frequency

Correct Answer: D

QUESTION 5

What HDFS replication factor should be used for locally attached storage in HDFS?

- A. 4
- B. 2
- C. 3
- D. 1

Correct Answer: B
