

1Z0-1096-22^{Q&As}

Oracle Machine Learning using Autonomous Database 2022 Specialist

Pass Oracle 1Z0-1096-22 Exam with 100% Guarantee

Free Download Real Questions & Answers **PDF** and **VCE** file from:

<https://www.pass4itsure.com/1z0-1096-22.html>

100% Passing Guarantee
100% Money Back Assurance

Following Questions and Answers are all new published by Oracle
Official Exam Center

-  **Instant Download** After Purchase
-  **100% Money Back** Guarantee
-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

**QUESTION 1**

Which two statements are true about supervised machine learning?

- A. There is no previously known result to guide the algorithm in building the model.
- B. It does not specify a target, it can be applied to a population of interest.
- C. It is used to extract meaningful insights from raw data to improve data operational efficiency.
- D. It generally results in predictive models.
- E. The learning process is directed by a previously known dependent attribute or target.

Correct Answer: DE

Explanation: Supervised learning is also known as directed learning. The learning process is directed by a previously known dependent attribute or target. Directed data mining attempts to explain the behavior of the target as a function of a set of independent attributes or predictors. Supervised learning generally results in predictive models. This is in contrast to unsupervised learning where the goal is pattern detection. The building of a supervised model involves training, a process whereby the software analyzes many cases where the target value is already known. In the training process, the model "learns" the logic for making the prediction. For example, a model that seeks to identify the customers who are likely to respond to a promotion must be trained by analyzing the characteristics of many customers who are known to have responded or not responded to a promotion in the past.

QUESTION 2

Which three statements are true about unsupervised machine learning?

- A. There is no previously known result to guide the algorithm in building the model.
- B. It uses unlabeled data.
- C. It analyzes cases where the target value is already known.
- D. It can be used as a preliminary step for supervised algorithms.

Correct Answer: ABC

QUESTION 3

Which three are supervised machine learning algorithms?

- A. Random Forest
- B. Support Vector Machines
- C. Linear Regression
- D. Association rule

E. K-means clustering

Correct Answer: ABC

QUESTION 4

Which three statements are true about Oracle Machine Learning Notebooks?

- A. It is used to manage and monitor database objects.
- B. It provides a web-based interface for data analysis.
- C. It is used to access machine learning algorithms.
- D. It is used to create low-code applications.
- E. It is used for data preparation and exploration.

Correct Answer: BCE

QUESTION 5

You are working as an application developer using Oracle Machine Learning Notebooks and want to get your project and notebooks reviewed by a subject matter expert (SME). You granted the Developer permission to the SME on the workspace.

Which two actions can be performed by the SME?

- A. Create new projects.
- B. Create jobs for shared notebooks.
- C. View, create, run, and update any notebook in the workspace.
- D. Create new workspaces.
- E. View and run jobs of shared notebooks.

Correct Answer: AD
