- ⚙️ **100% Money Back** Guarantee
- ⚙️ **365 Days** Free Update
- ⚙️ **800,000+** Satisfied Customers

**QUESTION 1**

What is the correct sequence of function invocations of AutoML API from OML4Py to solve a business problem?

- A. Model tuning. Algorithm selection. Feature selection
- B. Model selection, Algorithm selection
- C. Algorithm selection, Feature selection. Model tuning
- D. Model selection, Algorithm selection

Correct Answer: C

QUESTION 2

In which format is an Oracle Machine Learning Notebooks notebook saved or exported?

- A. JSON
- B. XML
- C. CSV
- D. custom binary format

Correct Answer: A

QUESTION 3

Which two statements are true about supervised machine learning?

- A. There is no previously known result to guide the algorithm in building the model.
- B. It does not specify a target, it can be applied to a population of interest.
- C. It is used to extract meaningful insights from raw data to improve data operational efficiency.
- D. It generally results in predictive models.
- E. The learning process is directed by a previously known dependent attribute or target.

Correct Answer: DE

Explanation: Supervised learning is also known as directed learning. The learning process is directed by a previously known dependent attribute or target. Directed data mining attempts to explain the behavior of the target as a function of a set of independent attributes or predictors. Supervised learning generally results in predictive models. This is in contrast to unsupervised learning where the goal is pattern detection. The building of a supervised model involves training, a process whereby the software analyzes many cases where the target value is already known. In the training process, the model "learns" the logic for making the prediction. For example, a model that seeks to identify the customers who are likely to respond to a promotion must be trained by analyzing the characteristics of many customers

who are known to have responded or not responded to a promotion in the past.

QUESTION 4

Which three data sources can be immediately used for model building in Oracle Machine Learning?

- A. Oracle Database External tables
- B. JSON files
- C. CSV files
- D. Oracle Database views
- E. Oracle Database tables

Correct Answer: ABE

QUESTION 5

You have created a notebook and want to run the notebook on a periodic schedule. How should you achieve this?

- A. You cannot run the notebook on the scheduled time.
- B. You can create a job and schedule it to run a specific notebook.
- C. You have to login as the admin user and schedule a job to run the notebook.
- D. You need to contact the database administrator to configure the notebook to run at a particular time.

Correct Answer: B
