**QUESTION 1**

You have a complex Python code project that could benefit from using Data Science Jobs as it is a repeatable machine learning model training task. The project contains many subfolder and classes. What is the best way to run this project as a job?

- A. ZIP the entire code project folder, upload it as a Job artifact on job creation and set JOB_RUN_ENTRYPOINT to point to the main executable file.
- B. ZIP the entire code project folder and upload it as a Job artifact on job creation, Jobs identifies the main executable file automatically.
- C. Rewrite your code so that a single executable Python or Bash/Shell script file.
- D. ZIP the entire code project folder and upload it as a Job artifact Jobs automatically identifies That main top level where the code is run.

Correct Answer: A

QUESTION 2

You are building a model and need input that represents data as morning, afternoon, or evening. However, the data contains a time stamp. What part of the Data Science life cycle would you be in when creating the new variable?

- A. Model type selection
- B. Model validation
- C. Data access
- D. Feature engineering

Correct Answer: B

QUESTION 3

You trained a model to predict housing prices for your city. Which two metrics from the Accelerated Data Science (ADS) Evaluation class can be used to evaluate the regression model you just trained?

- A. Mean Absolute Error
- B. Explained Variance Score
- C. Weighted Recall
- D. Weighted Precision
- E. F-1 Score

Correct Answer: AB

QUESTION 4

Which TWO statements are true about published conda environments?

- A. The odsc conda init command is used to configure the location of published conda environments.
- B. They can be used in Data Science Jobs and model deployments.
- C. Your notebook session acts as the source to share published conda environment with team members.
- D. You can only create published conda environment by modifying a Data Science conde
- E. They are curated by Oracle Cloud Infrastructure (OCI) Data Science.

Correct Answer: AC

QUESTION 5

Select two reasons why it is important to rotate encryption keys when using Oracle Cloud Infrastructure (OCI) Vault to store credentials or other secrets.?

- A. Key rotation allows you to encrypt no more than five keys at a time.
- B. Key rotation reduces risk if a key is ever compromised.
- C. Key rotation improves encryption efficiency.
- D. Periodically rotating keys make it easier to reuse key.
- E. Periodically rotating keys limits the amount of data encrypted by one key version.

Correct Answer: BD
