QUESTION 1

View the Exhibits to inspect the picklist properties and your existing records. You are using an existing pick list to help users enter values for the Status field on Service Requests. Your requirements have changed and now instead of displaying "Pending" in the list, you want to display "Waiting for Customer". You have a single language implementation.

Which two are true? (Choose two.)

Properties	
Pick List [PickList SR Status]	
Alphabetic Categorized	
Bounded	TRUE

Field Visit

Quoted

- A. Existing records with Pending values will display Pending when they are next displayed.
- B. You must create a new Pick List object definition.
- C. You must administer the list of values with type SR_STATUS and change the Pending Display Value to Waiting for Customer.
- D. Existing records will change from Pending to Waiting for Customer when they are next displayed.

E. When you edit the Summary field on an existing record with status Pending, you will be forced to change the status.

Correct Answer: AC

QUESTION 2

What does the Component Reconfiguration feature allow you to do?

- A. Modify component parameters while allowing existing component tasks to continue running using the old parameters.
- B. Activate reconfigured components at the next server restart.
- C. Move server components from one server to another.
- D. Stop all current instances of a component and restart them with new parameters.

Correct Answer: A

QUESTION 3

What is the base table for the Contact business component?

- A. S_CONTACT
