QUESTION 1

If an internal order is not required for the transfer between two organizations, then an interorganizational transfer of material (either direct or intransit type) between the inventory organizations applies to:

1. the transfer of material between inventory organizations across operating units
2. the transfer of material between inventory organizations within the same operating

- A. 2 only
- B. 1 only
- C. both 1 and 2

Correct Answer: C

QUESTION 2

You specified cycle count measurement error values when you defined your item at the master item or organization item level. You also specified a cycle count quantity variance approval tolerance at the cycle count item level. If the actual cycle count quantity for your item differs from the system on-hand quantity by less than the specified measurement error, Oracle Inventory _____.(Select one answer)

- A. does not consider cycle count approval tolerance but makes a cycle count adjustment
- B. applies the measurement error to the cycle count approval tolerance before the approval decision and makes a cycle count adjustment when approved
- C. applies the measurement error to the cycle count approval tolerance before the approval decision and does not make a cycle count adjustment when approved
- D. does not consider cycle count approval tolerance and does not make a cycle count adjustment

Correct Answer: B

QUESTION 3

Which two statements are true regarding item standard costs, if the inventory organizations are setup to use their own organization as the costing organization? (Choose two.)

- A. An item can have different standard costs across different inventory organizations of a single operating unit.
- B. An item can have different standard costs across different inventory organizations regardless of the operating unit.
- C. An item can have different standard costs in different inventory organizations only if the organizations are under different operating units.
- D. An item cannot have different standard costs across different inventory organizations of a single operating unit.

Correct Answer: AB

QUESTION 4

Identify the type of entity against which Oracle Inventory charges a transaction.
