**QUESTION 1**

You are using cycle counting, the quantity variance approval tolerances are specified at these levels: Cycle count header level Cycle count class level Cycle count item level If the tolerances are set up at all the levels, which tolerance is considered first by Oracle Inventory?

- A. Inventory organization level
- B. Cycle count header level
- C. Cycle count class level
- D. Cycle count item level

Correct Answer: D

---

**QUESTION 2**

A customer who distributes widgets has a warehouse with locations where material is stored. In the customer's current system, users may receive material on a purchase order and indicate the location where it should go, but when the material is physically sent to the location, they may discover that the location is full. What is the best way to solve the problem ?

- A. Set up each location as an organization and create locators in the organization.
- B. Set up the locations as locators, and use the capacity tab of the locator definition form to enter the maximum number of items that can be stored in the locator.
- C. Set up each location as a subinventory and select the nettable flag.
- D. Set up each location as a subinventory and select the Allow Reservation flag.

Correct Answer: B

---
