QUESTION 1

A Process Scheduler process is configured to run an Application Engine program. You need to modify the process to use parameters entered by the user at run time. Which four additional steps do you need to take? (Choose four.)

- A. Create a process type for the new process.
- B. Add bind variables to the command-line parameters.
- C. Write a PeopleCode program to pass the parameters.
- D. Create a state record with fields to pass input parameters.
- E. Create a run control page with fields to enter the input parameters.
- F. Create a run control record with fields to store the input parameters.
- G. Modify the Application Engine program to retrieve the input parameters.

Correct Answer: DEFG

QUESTION 2

View the Exhibit.

The PeopleCode action contains this code:

```
If AE_STATEREC_AET.TYPE = Then AE_STATEREC_AET.AE_SECTION= PDATEA Else  
AE_STATEREC_AET.AE_SECTION= PDATET End-If;
```

What will be the result?

PSU_INACT_3 (App Engine Program)

Definition | Program Flow

Section	Step	Action
MAIN	MAIN description	MAIN.GBL default: 1900-01-01
StepM01	StepM01 description	MAIN.GBL default: 1900-01-01
	001	Commit After: Default Frequency: Default On Error: Abort <input checked="" type="checkbox"/> Active
PeopleCode	PeopleCode description	On Return: Skip Step
Call Section	Call Section description	Section Name: Program ID: (current) <input checked="" type="checkbox"/> Dynamic
UPDATEA	Section1 description	UPDATEA.GBL default: 1900-01-01
UPDATET	Section1 description	UPDATET.GBL default: 1900-01-01

- A. The Call Section will call either UPDATEA or UPDATET based on the value of AE_STATEREC_AET.TYPE.
- B. The Call Section action will show an error. The PeopleCode program also needs to populate the field AE_STATEREC_AET.AE_APPLID.
- C. The Call Section action will show an error. The PeopleCode program also needs to populate the field AE_STATEREC_AET.AE_APPLID, not AE_STATEREC_AET.AE_SECTION.
- D. The Call Section action will not execute because the PeopleCode program needs to pass values to the state record using bind variables.
- E. The Call Section action will show an error because UPDATEA and UPDATET are not public sections.

Correct Answer: A

QUESTION 3

An Application Engine program is structured with sections, steps, and actions. Which two statements are correct? (Choose two.)

- A. Steps can call other steps.
- B. Sections execute sequentially.
- C. Steps can call other programs.
- D. Steps execute alphabetically within a program.

E. Sections are ordered alphabetically following MAIN.

Correct Answer: CE

QUESTION 4

An Application Engine program uses a Do Select action. What occurs when the Select statement is executed?

- A. Each row returned by the Select statement is stored in the state record. The Select statement continues until no more rows are returned. Then, the control passes to the calling section.
- B. All rows returned by the Select statement are stored in a cursor. Then, the control is passed to the calling section.
- C. All rows returned by the Select statement are stored in the state record. Then, the control is passed to the next section in the program.
- D. All rows returned by the Select statement are stored in a cursor. The first row is stored in the state record. Then, the remaining actions in the step are processed sequentially. Thereafter, the control returns to the Do Select to fetch another row, until no more rows are returned.
- E. When a row is returned, the remaining steps in the section execute and control returns to the calling step.
- F. When a row is returned, it is stored in the state record. Then, the control is passed to the calling section.

Correct Answer: D

QUESTION 5

View the Exhibit.

Your client is upgrading its purchasing application to use object-oriented PeopleCode to incorporate the benefits of application classes.

The PeopleCode for the Purchase Order application is now encapsulated in an Application Package called PSU_PO. The assign_order_nbr function is now ORDER_NBR, a method of the ORDER class.

You are tasked with modifying this program to call the new ORDER_NBR method.

Which four PeopleCode statements will you use in the new program? (Choose four.)

```
PSU_PO_HDR.ORDER_NBR.SavePreChange (Record PeopleCode)

ORDER_NBR (field) SavePreChange

Declare Function assign_order_nbr PeopleCode
FUNCLIB_ED_SVCS.ORDER_NBR FieldFormula;

If PSU_PO_HDR.ORDER_NBR = "NEW" And
   %Mode = "A" Then
   /* Assign Order Number to */
   assign_order_nbr(PSU_PO_HDR.ORDER_NBR);
End-If;
```

- A. Class PSU_PO:ORDER;
- B. andNew.ORDER_NBR(PSU_PO_HDR.ORDER_NBR);
- C. Import PSU_PO:ORDER;
- D. Declare method PSU_PO:ORDER:ORDER_NBR;
- E. andNew = Create Order();
- F. Local ORDER andNew;
- G. Method ORDER_NBR (andORDER_NBR As Field out);

Correct Answer: BCEF
