### QUESTION 1

| the customer's discount threshold |                                 |
|-----------------------------------|---------------------------------|
| 0                                 | The customer is a gold member   |
| \$100                             | The customer is a silver member |
| uncertain                         | otherwise                       |

Assuming "the customer's discount threshold" is an existing currency attribute, which two changes should you make to the rule for it to pass Validation?

- A. Insert quotation marks around "uncertain".
- B. Change "otherwise" to OPM ?conclusion style.
- C. Change "the customer's discount threshold" to "the customer's discount threshold is".
- D. Swap column 1 and column 2.
- E. Remove the \$ sign.
- F. Change "The customer is a silver member" to OPM ?level 1 style.
- G. Change "the customer's discount threshold" to "the customer's discount threshold =".

Correct Answer: DF

### QUESTION 2

You created a policy model and now want to deploy the current project to the Hub. You also want to restrict the interview so that it cannot be utilized anonymously by end users.

Which two steps are required to accomplish these two goals?

- A. Through Policy Modeling, click Deploy Snapshot and enter your credentials to deploy your project.
- B. Through Policy Modeling, click Mapping Settings and configure which group should be able to access the interview.
- C. Through the Hub, click Deploy New Project and navigate to your project to deploy your project.
- D. Through the Hub, click Access Settings and configure which group should be able to access the interview.

Correct Answer: BD

### QUESTION 3

Which three actions will help avoid or identify a multiply proven attribute error?

- A. Double-click the attribute on the Interview tab to see if the attribute is used on multiple screens.
- B. Use the "Go To" option in Word to see if the attribute is proven in another rule.
- C. Right-click the attribute on the Data tab to see if the attribute is proven in another rule.
- D. Right-click the attribute on the Project tab to see if the attribute is used in multiple forms.
- E. Check the error list on the Rules tab for multiply proven attribute errors.

Correct Answer: CDE

---

#### QUESTION 4

A student admissions system must capture multiple study preferences for a prospective student. Each preference includes a preferred campus. If the student is electing to study at the Sydney campus, then the student should be asked accommodation questions.

Which condition should you use to conclude that "the student should be asked the accommodation questions"?

- A. Exists (the preferences, the preference\\'s campus) = "Sydney"
- B. ValueAt (the preferences, the preference\\'s campus = "Sydney")
- C. InstanceCount (the preferences, the preference\\'s campus) = "Sydney"
- D. Exists (the preferences, the preference\\'s campus = "Sydney")
- E. InstanceEquals (the preferences, the preference\\'s campus) = "Sydney"

Correct Answer: C

#### QUESTION 5

You have a source material for your policy model that reads as follows:

"Only families who meet the minimum work and education requirement are eligible for the competitiveness credit. A family meets the work and education requirement if all of its members are either gainfully employed or enrolled in a full-time study program. Families in which a member does not meet the requirement but is actively searching for a job can apply for a waiver".

Which statement describes the entity structure that your policy model should have?

- A. The rules will infer the necessary entities by using automatic data types.
- B. Create an entity for "the family member" an entity for "the family", and an entity for "the minimum work and education requirement".
- C. Create an entity for "the family member" and use the global entity.
- D. Create an entity for "the family member" and an entity for "the family".

Correct Answer: B
